You may be aware that female ratio in the age group of 0 – 6 years is declining fast. This is more severe in urban areas of majority of States and in the relatively affluent regions like Punjab, Haryana, Himachal Pradesh, Gujrat, Maharashtra, Delhi, Chandigarh etc. The Govt. of India has expressed great concern in the matter. In this connection, a Brief Note on Prenatal Sex Determination & Female Foeticide is enclosed for your kind perusal.

As desired by the Ministry of Health & Family Welfare and Ministry of Urban Employment & Poverty Alleviation, GOI, you are requested to help spread the message against the Practice of Sex Selection and Female Foeticide in whatever manner is feasible, particularly through the health programmes being implementing in your ULB and take further necessary action to stop the menace.

This issue may also be highlighted during group discussion conducted at various level under IEC Programme towards dissemination of message.

Brief Note on Prenatal Sex Determination and Female Foeticide

The era of technology for prenatal sex determination (SDT) is traced back to 1970. But the initial method gave way to relatively safer non-invasive technique i.e. Ultrasonography. Very soon Ultrasound Clinics mushroomed all over India particularly in North India, leading to female foeticide in great number. Eventually, there was public outcry against the deplorable practice for female foeticide. 1991 census showed further decline in female : male ratio i.e. 927 females to 1000 males. Govt. of India enacted PNDT (Prenatal Diagnostic Techniques – Regulation and Prevention of Misuse) Act. 1994. This Act provided for regulation of the use of Prenatal Diagnostic Techniques for the purpose of detecting genetic disorder and for prevention of misuse of such technique for the purpose of Prenatal Sex Determination leading to Female Foeticide.

Ban on sex determination technique could not pull the rein on occurrence of female foeticide as would be seen in the results of 2001 census which revealed a sex ratio of 933 females : 1000 Males, which indicated failure to improve much above the previous census data of 1991 in this respect. The situation in North India was the worst where the ratio was 727 : 1000. To control the situation strict enforcement of PNDT Act. was contemplated by the State Govts. in North India with numerous raids on Ultrasound Clinics and cancellation of registration of many such clinics.

A study on Sex Determination Test and Practice of Female Foeticide was conducted in North India during 2002 – 2003. Overall 1162 women aged between 15 years – 29 years were screened in 11 villages having a population of 16475. The salient findings of the study are as under :

- 200 women (17.2%) were enlisted as pregnant. Of them 59% were aged 21 – 25 years. 13% were aged less than 20 years.
- Literacy rate was 73%.
- Living in joint family 74%.
- Caste-wise, 1/4th were Hindu high caste, 65% were Hindu-backward or low caste.
- 134 cases (67%) reported test done during pregnancy. 45 cases had Ultrasound test done.
- 23 cases (13%) confessed test done for sex determination.
- 95% had knowledge of Ultrasound test is being done for sex determination.
- 83% opined Sex Determination Test (SDT) practice is not good.
- Two cases of female foeticide was done out of three cases where sex of foetus was declared as female.

Some observations on response about status of daughter in the family :

- Problems of parents for going out at night leaving behind the daughter at home.
- Daughters need more careful rearing – lest they go astray.

Contd. to P-2.

Lamp of house remains lighted if son is there.

Son is needed to run household.

With sons family tree grows.

With sons one's home is run and with daughters other's home.

All family traditions / customs / rituals are dependent on sons.

Now a days everyone is equal.

People don't want daughters.

The number of females are getting lesser, then how will boys get married?

Thus, the observations revealed the cause as 'Son syndrome' which is a reflection on the low status of females in our society.

To tide over the crisis some amendments to PNDT Act, have been proposed by the Technical Committee appointed by Health & FW Ministry. The proposed amendments are as under :

○ Inclusion of sex selection before conception. Prohibition of sex selection / determination, before or after conception.

○ Mandatory registration of Ultrasound machines.

○ Vesting upon the appropriate authority (which is Chief Medical Officer of the District) the same powers as are vested in Civil Court to deal with person / agent communicating sex of foetus.

○ Hiking up of punishment of both errant doctors and clients (except pregnant women) associated with sex selection. Period of suspension of doctors increased to 5 years from 2 years and registration will be suspended till disposal of case. For clients imposition of fine had been doubled upto Rs. 1.00 lakh.

Supreme Court of India in a Judgement dated 10.09.2003 in a Public Interest Litigation case on PNDT (now renamed as Preconception and Prenatal Diagnostic Techniques / Prohibition of Sex Selection) Act 1994 effective from 01.01.1996 issued directions to all the State Govt. / UT Administrations for the following :

a) To appoint by notification fully empowered 'Appropriate Authorities' at District / Sub-District levels and also setting up of Advisory Committees to aid and advice the appropriate authority in discharging of its function.

b) To publish a list of appropriate authority in the print and electronic media in the respective State / UT.

c) To create public awareness against the practice of Prenatal Determination of Sex and Female Foeticide through advertisement in the print and electronic media, by hoarding and other appropriate means.

Contd. to P-3.

- d) To ensure that all the States / UT appropriate authorities furnish quarterly returns to CSB (Central Supervisory Board) giving a report on the implementation and working of the Act.

From all above, it can be concluded that –

- i) Female / male ratio is fast declining.
- ii) If this trend persists it is likely to cause social crisis in due to imbalance in female : male ratio in the population profile.
- iii) Prenatal Sex Determination and Sex Selection is a crime punishable under law.

Foreword

On the basis of his deep study and the practical experience the author has produced a useful and handy book on the law and practice relating to the registered societies in West Bengal. The old 1860 Act has been repealed in the State long ago. Yet a few people know the details of the West Bengal Act. Still many clubs, libraries, educational institutions and other societies are bound by the provisions of this Act. The author's short book on the subject will be extremely useful for the members and the office-bearers of the registered societies in this State. The book contains important notes and forms regarding the formation and management of the registered societies. I am confident that this book will be welcomed by legal practitioners and others who are connected with the registered societies in the State.

Sub : Paid Absence on Maternity and Abortion/
Miscarriage to Honorary Female Staff of
all categories engaged in IPP/CUDP-III/
CSIP Health Programme under C.M.D.A.

The question of extending the benefit of 'Paid Absence on Maternity and Abortion/Miscarriage' to different categories of female staff working on honorarium basis in IPP VIII/CUDP-III/CSIP Health Programme was under the consideration of the Authority for sometime past.

After careful consideration of the matter it has been decided that -

- a) Female workers of all categories who are working on honorarium basis in IPP VIII/CUDP-III/CSIP Health Programme and have been engaged for a minimum period of one year may be allowed "Paid Absence on Maternity" for a period of 12 weeks. This period of 12 weeks may cover any period from 8 months of pregnancy upto the end of 3rd month of lactation.
- b) "Paid Absence on Maternity" would be admissible for one occasion only.
- c) "Paid Absence on Abortion/Miscarriage" would also be admissible to such eligible female workers as described in (a) above, for a maximum duration of 42 days from the date of occurrence of abortion/miscarriage.
- d) "Paid Absence on Abortion/miscarriage" would be admissible only on one occasion in addition to the "Paid Absence on Maternity" as mentioned at (b) above.
- e) During these periods of "Paid Absence on Maternity" and "Paid Absence on Abortion/miscarriage" all such female honorary workers will be eligible for honorarium.
- f) The application for leave should be supported by appropriate medical certificate i.e. by a medical practitioner.

g) The "Paid Absence on Maternity and Abortion/miscarriage" so granted herein will not be applicable to such category of personnel who are regular employees of the State Govt. or Corporations/Municipalities, even if they may work for IPP VIII/CUDP-III/CSIP Health Programme on part time basis with additional remuneration. Such regular employees will be governed by the Leave Rules of their respective parent body.

This will take effect from 1st April, 1997.

This order issued with the approval of the Competent Authority at C.M.D.A.
