PREFACE

The National Urban Housing & Habitat Policy (NUHHP), 2007 aims at promoting sustainable development of habitat in the country with a view to ensuring equitable supply of land, shelter and services at affordable prices to all sections of the society. However, the most vulnerable of these are the urban homeless.

The Urban homeless persons contribute to the economy of the cities and thus the nation's cheap labour in the informal sector; yet they live with no shelter or social security protection. The urban homeless survive with many challenges like no access to elementary public services such as health, education, food, water and sanitation.

National Urban Livelihoods Mission (NULM) aims at providing permanent shelter equipped with essential services to the urban homeless in a phased manner under the Scheme of Shelter for Urban Homeless (SUH).

The objectives of the Shelter for Urban Homeless (SUH) component of NULM scheme are to:

- Ensure availability and access of the urban homeless population to permanent shelters including the basic infrastructure facilities like water supply, sanitation, safety and security;
- Cater to the needs of especially vulnerable segments of the urban homeless like the dependent children, aged, disabled, mentally ill and recovering gravely ill, by creating special sections within homeless shelters and provisioning special service linkages for them.
- Provide access to various entitlements, viz. social security pensions, PDS, ICDS, identity, financial inclusion, education, affordable housing etc. for homeless populations.

Formulate structures and framework of engagement for development, management and monitoring of shelters and ensuring basic services to homeless persons, by state and civil society organisations including homeless collectives.

In pursuance of the decision taken by the West Bengal State Urban Livelihood Mission for setting up a "Shelter for Urban Homeless (SUH)" under National Livelihood Mission in Haldia and with a view to providing shelter to the homeless people living in this town, the Board of Councillors' in this Municipality has decided in its meeting held on 27.02.2015 that a proposal would be sent to the SULM for setting up a shelter for urban poor in this town.

A survey was conducted for ascertaining the status of the urban homeless and 50 (fifty) homeless persons have been identified as poorest of the poor. A project has been prepared in conformity with the objectives and a guideline issued in this regard, which includes interalia, construction of a four storied building with the provision of all amenities as envisaged in the scheme.

It is believed that the proposed project would not only provide shelter to the homeless people belonging to the most vulnerable segment of the society but also could ensure availability and access of those urban homeless people to various other entitlement like social security etc besides the basic civic services like water supply, sanitation, electricity and primary health care etc.

THE PRESENT STATUS AND FUTURE POSSIBILITIES OF HALDIA INDUSTRIAL COMPLEX.

Haldia is emerging as a major growth area since the commissioning of the Haldia Dock System in 1972. Endowed with modern port facilities, the area offers good location of justification for setting up industrial units.

As the main function of Haldia Municipality is to help development of adequate infrastructure facilities in the area to facilitate the growth of Haldia as a modern industrial complex, it is necessary to know the present status including infrastructure facilities which have been created so far and its future possibilities.

PRESENT STATUS

HALDIA DOCK COMPLEX

It was commissioned in February 1972 though the shipping activities started in 1968 with the commissioning of Oil Jetty to feed the Haldia Oil Refinery. It is a comprehensive Project providing composite cargo like Crude, Coal, Petroleum Product, Fertilizer, raw materials finished fertilizer, phosphoric acid, edible oil and molasses. It also provides for full-fledged container handling facilities. The traffic handling has been steadily increasing. It is learnt that some schemes for expansion were likely to be included in the coming plans.

EXISTING INDUSTRIES

Haldia's existing industrial base, social infrastructure and transport linkage makes the town a good choice for further growth of industries. The upcoming major petrochemical complexes of Haldia Petrochemicals Ltd. (Rs. 51,700 million Project) and purified Terephthalic Acid (PTA) Plant of Mitsubishi Chemical Corporation (Rs. 14,000 million Project) add a new dimension to these possibilities by acting as the mother unit for setting up both upstream and downstream industries. HPL has been officially

inaugurated on 22nd April 2000 and PTA Plant of MCCPTA on 11th April 2000. With the commissioning of HPL and MCCPTA Plants a number of upstream and downstream industries are expected. Thus, the town of Haldia would see major economic activity in the years to come.

The Project will throw up a host of downstream possibilities. It will offer considerable scope for rejuvenating the old individual units and for development of an array on new chemical and plastic conversion units. This complex will produce raw materials both for the small-scale and large sectors and has the potential of offering employment to more than a lakh people in the downstream projects. About seventy-five downstream projects will be set up in Haldia Development Area, but it is expected that a good number of them will come up near petrochemical complex.
