P.O-Chakdaha, Dist.-Nadia, PIN-741222

(West Bengal)

Memo No. –

/CM

Dated-15.7.2019

B.O.A RESOLUTION OF RELEVANT PORTION(Dated-6.7.2019)

In the Chair of President: Mr.Unice Rishin Ismail,IAS,SDO,Kalyani

enda No.-2:

Today in its meeting BOA decides to appeal to SUDA for 600 quota of BLC mode D.U.s under HFA(U) for 2019-20 for this ULB. After that BOA approves the AIP of HFA(U)2019-20 well as the DPR for the same alongwith beneficiary lists of 600 no.(Recommended by the HMOS,GoWB & Member,BOA of this ULB Mrs. Ratna Ghosh Kar) for BLC mode D.U.s under HFA(U)for this ULB,for2019-20FY,whose eligibility criteria of the beneficiaries had been notified by the E.O&SAE concern jointly. Said approved Beneficiary details are attached herewith.

SD/-

U.R Ismail, IAS,
President

ATTESTED

[AMLAN KUSUM DAS]

Executive Officer
Chakdaha Municipality
Chakdaha, Nadia.

PREFACE

Pradhan Mantri Awas Yojana (PMAY) aims at Providing Housing for All (HFA) by 2022 when the Nation Complete 75 years of its independence.

The urban homeless persons contribute to the economy of the cities and thus the Nation as cheap labour in the informal sector; yet they live with no shelter or social security. The urban homeless service with many challenges like no access to elementary Public Services such as health, education, food, water and sanitation. Pradhan Mantri Awas Yojana (PMAY) also aims at providing a pucca house to every family with water connection, toilet facilities, 24 X 7 electricity supply and access.

The Mission seeks to address the housing requirement of urban poor including slum dwellers through "In Situ" Slum Redevelopment, Affordable Housing through credit linked subsidy, and Affordable Housing in partnership and subsidy for beneficiary led individual house. Under the mission, beneficiaries can take advantage under one component only.

We are hopeful that this ULB will be able to utilize the success of this Program for further Municipal developmental works & for upgrading the quality of civic life. It will facilitate this ULB to be self-reliant so that this town can be a potential generator of economic momentum in the desired direction.

The town has 74 Nos. Slum and 21 Nos. Non Slum Pockets. DPR has been prepared on 43 Nos. Slum and 21 Nos. Non Slum Pockets to minimize the deficiencies in civic amenities after carrying out necessary field survey work, the Slums.

This project report has been prepared for total outlay of Rs. 1939.00 lakhs and the physical schemes for this town have been identified on the basis of preliminary assessment befitting with the final and comprehensive development project plan for the entire town.

1. INTRDUCTORY NOTE AND BRIEF HISTORY OF CHAKDAHAMUNICIPALITY:

Executive Officer, Chakdaha Municipality

Chakdaha Municipality is a 129 years old Municipality in Nadia district of West Bengal. This Municipality is situated in between Kalyani and Krishnagar (District Town of Nadia district of West Bengal). It is roughly 64.7km away from Kolkata. But the significant feature of this small town is that it has some historical background of the past which enlighten even to days people who frequent this place as visitors or to find out the reminiscences of their fore fathers.

This is one of the oldest Municipalities. It still bore the sign of cultural heritage of its past. Some of the remains of construction of temples and architects signify the same.

This Municipality is competing with the modern developments of other Municipalities and coming out fast to enrich all out development whether in service sectors, cultural, socioeconomic development, educationally etc.

Civilization is a time continuing process. It started long ago and as the needs of the people enhanced so as the civilization. It is unfortunate that we are yet to develop our country in all sectors of civic amenities. The housing sector is one of such sector. We have been trying our best to achieve 100% result in this sector with the active support of Govt. of West Bengal. We are partially successful in this endeavor but we need to give shelter to the urban poor so that no one lives in a thatched house or in shanties.

As of now this Municipality is busy with the process of preparing Detail Project Report (DPR) of Housing For all under PMAY. With the strong leadership from the Chairman and its councilors and active support of the staff of our Municipality we are going ahead with this scheme to make it a success. We have taken oath that no one in this Municipality would remain starving even for a day; no one should remain without drinking water, sanitation, and clothing and above all shelter less.

Development is our only motto and we will not stop whatever obstacle comes our way. The task ahead is herculean one due to complexity of socioeconomic and political situation. However, preparation of Housing for All Plan of Action and implementation of the same in a time bound manner is not so easy job.

As this project is the first of its kind and this project would offer development of all slum dwellers and stop from further grow of slum localities which is a curse to the modern life, we are looking forward to make our Municipality a clean and habitable Municipality without any slum area. Our experience of the past would guide us and we are sure to achieve our dream

project for the first time. The Housing for All Plan of Action has been prepared with this in mind and we are looking forward for a great future.

City Profile and Overview

Chakdaha is a prominent urban local body in the district of Nadia – Nadia being one of the southern districts of West Bengal. Presently the Municipality consists of 21 wards covering an area of 15.36 Sq. K.Ms with a population of 95203 persons (as per CENSUS-2011).

HISTORY:

Chakdaha have a rich cultural history behind. Even today remnants of its heritage is scattered all over the town. People from various religious communities have peacefully lived in Chakdaha since its birth. A number of temples, mosques and other archaeological structures are witness of the past. Chakdaha was also an important center of indigo cultivation. Many areas within the municipal area and also the surrounding places show the debris of indigo factories. In 1789, a disastrous flood washed away all the factories along the Sukhsagar. It ended the indigo cultivation in Chakdaha. Chakdaha is a prominent urban local body in the district of Nadia – Nadia being one of the southern districts of West Bengal. Located on the banks of Bhagirathi River, Chakdaha derived its name from its mythological past. According to one of these stories, when river Bhagirathi was taking Ganga along this path, the wheel (Chaka) of his chariot got stuck in the sand, and from then on, that place became known as chakradaha or Chakdaha.

CLIMATE:

As per municipal record, the soil is sandy with alluvial soil found in certain places. The climate is moderate in nature, raising the summer temperature to 40°C, while the winter temperature falls down to 10°C. The average annual rainfall is about 150-160 mm. Based on Climate, Soil and Physiographic the South Asia Project Department, World Bank (1997) reported six agro climatic Zones of West Bengal. Among them New Alluvium Zone is the biggest Zone with highest cropping intensity and crop diversity covering the western parts of Malda and Dakshin Dinajpur, Southern parts of Uttar Dinajpur, eastern part of Murshidabad, Hoogly, Burdwan and Howrah, entire Nadia and northern part of North and South 24 Parganas.

SOIL AND GROUND WATER SCENARIO:

Soils of this zone are derived from recent alluvial deposits brought down by the river Ganga, and its tributaries hence called inceptisol. Soils are deep, well drained, texturally fine loamy, neutral in reaction, with high base saturation and CEC and medium to medium low NPK.

YEAR OF ESTABLISHMENT:

Once predominantly a Panchayat area under the British rules with only 5000 populations in 1885, it became a municipality on May Day 1886. John Beglar, a British Architectural engineer took the initiative to establish Chakdaha as a Municipality with Kazi Mirza Ittesshamuddin as its first Chairman.

ADMINISTRATIVE BOUNDARIES:

Chakdaha is located between 22°15'47" north latitude and 88°18'52" east longitudes on the world map. The Municipality is encircled by Gangaprasadpur in the north, national NH – 34 in the east Chanaduria and Rauturi Panchyat in the south. Ganga flows as the western boundary of the Chakdaha town. Buriganga and Churni Flows through the old Chakdaha into the Ganga. Village panchayats under it are – Chanduria I and II, Dewli, Dubra, Ghetugachhi, Hingara, Kanchrapara, Madanpur I and II, Saguna, Sarati, Silinda I and II, Simurali, Tatla I and II, Rautari.

ROAD-RAIL-AIR LINKAGES:

Nearest town within the 10 km radius is Ranaghat; while the district headquarter Krishnanagar is about 38 kms away and 62 kms from state capital Kolkata in the Nadia District, Traffic lifeline of the Chakdaha town mainly the eastern railways connecting Kolkata through Sealdah-Krishnanagar, Sealdah-Ranaghat mainline. In 1862, when a railway was introduced in Nadia District, it also connected Chakdaha for the first time.

LOCATION :

INDIA AND STATES

WEST BENGAL AND DISTRICTS

CHAKDAHA LOCATION

ECONOMIC ACTIVITY :-

Though agriculture was once a major economic activity, Chakdaha today is totally service sector oriented economy along with business as an unorganized informal sector. People living in Chakdaha Municipal area, work in the neighboring areas and in Kolkata. Industries are almost nonexistent except a few small-scale industries mainly plastic factories. Once Chakdaha was a center of jute industry but due to the change in the course of river it lost all its glory and importance. In the Chakdaha municipality small businesses are growing at a fast pace within the municipal area and constitutes a major economic base of the municipality. Population is rising at a very high speed resulting in higher and higher density of population. Existence of only seven small-scale industries implies that the municipality has to be run on taxes collected from the middle class residents, most of whom are service persons. Very little taxes are collected from the slums and poor colonies. So, it is very difficult to improve this municipal area only on the basis of municipal taxes. Chakdaha Municipality now comprehends the situation and plans to supplement this revenue through other sources..

Manufacturing and production oriented Activities
Plastic clothes Clip making
Pottery
Handloom
Umbrella Assembly
Brass and bell metal item making
Bucket making
Steel almirah making
Stove factory
Polythene pipe making

Pottery

Hand loom

Trading and Service oriented Services	
Textile and dress material	Fruit vending
Readymade garment	Xerox, Lamination
Stationary and Gift item	laundry
Grocery	Sweetmeat cum confectioners
Mobile connection	Hair cutting saloon
Medicine	Hosiery
Electrical and Electronic goods	Fish vending
Hardware related goods	Meat shop
Pan, Biri, Cigarette	Saree shop
Jewelry	Photo and Book Binding
Food joint	Embroidery

CHAKDA HAAT:-

An important feature of the Chakdaha's economic fabric is the Chakdaha Haat traditionally known as the Mrtyunjoy Singher haat which functions every Friday. The typical haat feature of temporary stalls is absent as majority of the sales counters are permanent shops. Thus transactions also happen on other days against a user charge paid to the Municipality. Products primarily evolve around handloom and textile based items. Sarees and readymade garments ranging from petticoat, children's dresses. Sarees comprise indigenous products as

well as sarees from the well known producing hubs in Phulia. The turnover of the *haat* is good as it serves as major trading centre for Kolkata as well as adjoining areas. However the haat suffers from environmental hazards. The adjoining pond is used as a dumping ground which emits stale odour. Further the area is devoid of any toilet facilities, which results in further deterioration of the environment.

09	Digester	1 nos.	25 lakhs
Total-			868.99.00

Balance expenditure was incurred from interest fund of IHSDP.

THE PROJECT IS FULLY COMPLETED.

Physical Infrastructure profile :-

Water Supply

The only source of Water Supply in Chakdaha is ground water. There are 3 water reservoirs, which were all constructed by PHE around 1977 – 1978 and handed over to the municipality in 2003. These reservoirs supply water to all wards in shifts. The supply of water to the reservoirs is done by 14 pumps of which 4 are defunct. These constructed throughout the period from 2003 – 2005. All of them are in good structural condition. These pump houses pump out 1 lakh gallons (4.55 lakh litres) of water every day. The total water supply in the municipality is 21,60,000 litres per day. The pump details are given in the following table.

: Location of Pumps:

Sl No	Name	Ward No

Drainage and Sanitation:-

The drainage collection network consists of the following;

Table 2.4 Drainage network

Kutchra Drain	30.00 kms
Pucca Drain	23.10 kms
Total	53.10 kms

Source: Municipality

Wastewater from individual houses, markets and other institutions flows through the existing drainage system and is discharged into natural watercourses. Over and above the aforesaid wastewater, storm water is also received and transported to the outfall through the same drainage system.

The Major drains of the Chakdaha Municipality is described below

1. From Khudiram pally running through Uttar Ghoshpara , Narendra pally , Natun pally discharging into old Bhagirathi
2. From Kathalkuli through Narendra Pally , Natunpara to Old Bhagirathi
3. From S.P Mukherjee through Uttar Ghoshpara , Narendra Pally , Pallysree discharging into Old Bhagirathi
4. From N.S Road along the ferryghat road.
5. From /subhas Nagar through Rajbagan to Old Bhagirathi.

Sanitation and Sewerage Network

Chakdaha municipal town is a non-sewered town but with drainage system through small and big nikashi drains, other open drains. At present there are no sewage collection and treatment system in the municipality. It has been reported in the survey that 80% households of the Municipality area are having sanitation facility. The facility available is in the forms of sanitary latrine with septic tank at individual household. Discussion with the citizens reveals that regular cleaning of the soak pit and septic tanks are one of the most important needs of sanitation in Chakdaha.

Type of Sanitation

Chakdaha Municipality has no sewer connection, but Urban Household survey responses indicated that 0.25% households are connected with sewer connection. In this analysis actually it has been considered as sanitation with septic tank connection. 2 - pit pour flush sanitation is mostly available (50.84%) in the municipality area,

while 30.24% households are connected with septic tank. Around 19% are having pit latrine and other means of sanitation system. Which needs special attention? Ward No 1, 4, 6, 10, 14, 20 has other means of sanitation facility while Ward 11, 16 has pit latrines, special attention to be given to these Wards.

Solid Waste Management:-

The Solid Waste Management System in Chakdaha is in the most nascent stage. Solid waste management comprises collection and dumping of garbage from the roadside. 3 metric tones of garbage is collected on a daily basis. The Municipality has not adopted any scientific disposal of waste as yet. In fact the present system of Solid waste management are by and large outdated on account of lack of technical know how and constraints of tools, vehicles, equipment, funds, manpower etc. the general practice of the SWM is to dump it in open land and let it undergo natural decomposition. However the service of collection and disposal is very irregular. The dumpsites are also found to be congenial to the growth of bacteria and pathogens. There is careless dumping resulting in contamination of ponds and river. Except in few residential and commercial areas, most of the houses, shops and other establishments do not use dustbins and throw the waste as and when generated. As a result the whole of the town become the collection point posing threat to environment and health of the people. Waste is collected by handcart to secondary transport points that are 4 permanent vats. The trailers are as old as 10 years, all open with capacity of 3 to 4 tones. These are in bad state and require replacements. There is just one dumping ground, which is about 10 years old. There is no facility of composting or any landfill site.

: Solid Waste Management Equipments :

Items	Number
Trailer	6
Permanent Vat	4
Dumping Ground	1

Source: Municipality

Table no: 2.6 Estimation of Per Capita Municipal Solid Waste Generated Per Day

Population Range (in million)	Average per Capita value (Kg/Capita/day)	Average Density
0.1	0.21	425 kg/cum
0.1-0.5	0.21	
0.5-1.0	0.25	
1.0-2.0	0.27	
2.0-5.0	0.35	
5.0 and above	0.50	

Source: Manual on Municipal Solid Waste Management - Govt. of India

In accordance with the manual, the waste to be generated in the next two decades, in the municipality is calculated @ 0.21 Kg / capita / day is as follows: -

: Waste Generated by 2021:

Sl no	Year	Population	Waste generated (Kg)	MT
1	2001	86965	18262	18.26
2	2011	105228	22098	22.098
3	2021	210455	44196	44.196

Source: Manual on Municipal Solid Waste Management - Govt. of India

Such large volume of waste created in the municipality needs a scientific solid waste management system with segregation at source, door-to-door collection, primary and secondary disposal and finally management at land filling site

The present dumping ground as shown in the photograph above is just dumping in open land without any kind of treatment or composting. The water bodies are getting polluted because of such illegal practices.

Road Coverage and Condition:-

The municipal area is connected by a bituminous road network of a length of about 102.5 km having widths varying from 12 ft to 60ft. Different types of vehicular traffic including heavy vehicles like buses and trucks ply on them. Most of the major roads are damaged and subjected to encroachments and congestion. The total length of roads according to municipal records is 150.50 kms.

Table No.2.8: Type of roads

Sl no.	Type	Length in kms
1	Black topped	114. 40
2	WBM Road	8. 00
3	Brick Solving	22.80
4	Concrete	3.35

Source – Municipality records

According to the Urban Household Survey, It has been reported that approach road is semi Pucca by 47.14% households followed by access of Pucca road by 24% households and Kutcha road by 28.83% households.

Population residing at Ward No 1,3,4,10, 18, 19, 20 has opined of access of Semi Pucca road while residents of ward no 2, 8, 18, 5,6,12, 15, 17 has reported access to Kutcha road.

Approach roads to Hosuhold

HFAPoA and PradhanMantriAwasYojana(Housing for All)

To give pucca house for every family is currently on the global agenda. One of the Millennium Development Goals (MDGs) is to 'achieve significant improvement in the lives of slum dwellers, by 2022. Similar goals are set forth by Pradhan MantriAwasYojana in 2022, to create pucca house for every family.

ULB undertake a demand survey through suitable means for assessing the actual demand of housing. While validating demand survey, Cities should consider possible temporary migration from rural areas to the city just to take advantage of housing scheme and exclude such migrants from list of beneficiaries. On the basis of demand survey and other available data, cities prepare Housing for All Plan of Action (HFAPoA). HFAPoA should contain the demand of housing by eligible beneficiaries in the city along with the interventions selected out of four verticals. The information regarding beneficiaries is collected by ULB in suitable. While preparing HFAPoA, ULB and Implementing Agencies should also consider the affordable housing stock already available in the city as Census data suggests that large number of houses is vacant.

Bank account number and Aadhaar number/Voter ID card/any other unique identification details of intended beneficiaries or a certificate of house ownership from Revenue Authority of beneficiary's native district will be integrated in the data base of HFAPoA for avoiding duplication of benefit to one individual family. Beneficiaries are validated by ULBs thereby ensuring their eligibility at the time of preparation of the projects and approval of projects.

On the basis of HFAPoA, States/Cities subsequently prepare the Annual Implementation Plans (AIPs) dividing the task upto 2022 in view of the availability of resources and priority. For larger cities, HFAPoA and AIPs is prepared at sub-city (ward/zone etc.) level with the approval of concerned State/UT Government. The result of demand survey, draft HFAPoA and draft AIP is discussed with the local representatives including MLAs and MPs of that area so that their views are adequately factored in while finalising the plans and beneficiary list.

Cities which have already prepared Slum Free City Plan of Action (SFCPoA) or any other housing plan with data on housing utilise the existing plan and data for preparing "Housing for All Plan of Action" (HFAPoA). Houses constructed under various schemes should be accounted for while preparing HFAPoA

1. Situation assessment for HFAPoA

1.1 Background

As per the guideline of HFA Mission, Chakdaha ULB is also entitled for this Mission.

We had attended the state level workshop as organised by SUDA on last 13.9.2015 after that we had started the HFAPoA preparation process in our ULB. As per 2011 CENSUS among the total 95203 population the slum population is 39632 and the BPL population is 34554 in Chakdaha Municipal area. As per SECC the no. Of kuccha/semi kuccha household is 4219 & as per USHA survey (2011) the no. Of kuccha /semi kuccha household in slums are 4815. Under IHSDP total 1327 households had provided the dwelling units in 2 phase up-to-2011. Till date total 53 no.s dwelling units had provided under HUP project (state project) and 1 dwelling unit under Gitanjali project (state project). Due to increasing migrant population in slum and non-slum areas the demand for dwelling units among the LIG is also raising in our area. Increasing housing demand is also caused due to the rapid urbanisation in the fringe area of the town like, ward-12, 13, 2 etc. HFA Mission gives us the opportunity to bridge the gap in between supply and demand of the LIG housing to those, who have no pucca dwelling units for their family.

1.2 Approach and Methodology

- 1st: State Level Sensitisation workshop at SUDA-13.9.2015
- 2nd: ULB level sensitisation workshop to the stakeholders-14.9.2015
- 3rd: Identification of Surveyors & supervisors and organising their training-14.9.2015
- 4th: Sensitisation through local miking-14.9.2015 & 15.9.2015
- 5th: Starting of demand survey in all wards-15.9.2015
- 6th: Completion of survey-26.9.2015
- 7th: Survey for the left out peoples through ward committees-27-30.9.2015
- 8th: Data entry in the SUDA specified Compilation software-1.10.15-11.10.15
- 9th: sensitisation BOC meeting-30.9.15
- 10th: Consultation with the M.P&MLA on the draft HFAPoA: done
- 11th: BOC approval on HFAPoA: 13.10.2015
- 12th: Submission of HFAPoA to State Govt.-14.10.2015

Stakeholders Consultative Workshop / Meetings

Picture 1

Training programme

Picture 2

Sensitisation Workshop (ULB level with the stakeholders)

Picture 3

Data Validation Workshop

Summary: After sensitisation workshop with the stake holders we had started the demand survey process and through 2 BOC meetings we had approved the final HFA PoA for Chakdaha ULB.

Tenability Analysis

Tenable slums

74 slums of this ULB are tenable

- Untenable Slums and Strategy for slum resettlement if any
At present ULB has no land to resettle the untenable slums of Chakdaha Municipal area.

Assessment of Existing and likely Future Housing Shortage

al Housing Shortage in municipal area as per present demand survey is-2875 in which slum area housing shortage is-11. This housing demand figure may be increased by 20-25% as the Chakdaha Municipal area is adjacent to Bangladesh Border. It is a migration prone area also. Chakdaha Municipality is a developing urban area in the Kalyani subdivision of Nadia district. Chakdaha is a prominent business place in Nadia and it is adjacent to KMA area like Kalyani, Madanpur, Alaipur etc.

1. Existing Housing Shortage (Non Slums)

At present the non-slum housing shortage is as per demand survey-1311.

1.2. Likely future Housing Shortage

As per Census-2011 the Slum population of Chakdaha Urban area is-39632 and the slum house hold no. is-9674. As per Census-2011 the no. of marginal worker (in all respect) of this area is-14852. So the future housing shortage may be increased by 2022 as 20-25%.

3. Identification of four Options available under Mission

(Use table I and II of Guidelines) (Ref.-Demand Survey findings)

- "In-situ" Slum Redevelopment using land as Resource (include viability analysis)-NIL
- Credit-Linked Subsidy Scheme (CLSS)-NIL
- Affordable Housing in Partnership (AHP)-NIL
- Beneficiary-led individual house construction-2875 or enhancement-NIL

4. Intervention Plan and Central assistance.

Migration

Maximum dwellers have migrated from rural areas due to lack of employment in agriculture sector. All household had migrated from rural to urban area. Majority of the population of this slum is living for more than 5 years in this slum. Hence, dwellers are now permanently depending on 11 nos slums. This justifies as a parameter on the importance of Slum for In situ development.

Housing Status (For 2016-17)

Housing is the constituent of the social infrastructure of the economy. Like the other constituents, such as the system of education and health, housing also can either reduce or enhance the disparities in the society.

House Type / Structure

Most of the dwelling units have mud flooring closely followed by cement flooring. Firewood is the major source of cooking fuel in majority of the slum household.

Land Tenure status

All of the existing households are encroachment on Municipal land.

Physical Infrastructure

Infrastructure is the basic requirement of urban life and its adequacy and accessibility are two important ingredients and key contributors in the upgradation and enrichment of quality of urban life which is the primary objective of any planned development effort.

These infrastructure facilities are broadly classified into two aspects:

Physical infrastructure: Water supply, Drainage, Solid waste, Roads, Electricity.

Social infrastructure: Health, School, Community Hall, Lively Hood Centre

Status of Physical Infrastructure:-

Sl. no	Slum Name	Connectivity to City-wide Water Supply System	Connectivity to City-wide Storm-water Drainage System	Connectivity to City-wide Storm-water Drainage System	Connectivity to City-wide Sewerage System	Approach Road/Lane /Construct ed Path to the Slum	Internal Road	Whether Street light facility is available in the Slum	Primary Health Centre	Community Hall

Details of Social Infrastructure at a glance:

Education:- CURRENT SITUATION ANALYSIS

According to census 2001, the total population of Chakdaha Municipality is 86,990. A table is given below which shows the total number of literate and illiterates and percentage of literacy of Chakdaha Municipality.

Table 1: Literacy details

Literacy				Illiteracy			
Person	Male	Female	%	Person	Male	Female	%
68848	36987	31861	79.14	18151	7252	10899	20.86

Source: Census 2001

In Chakdaha Municipality highest no of literate person lived in ward no 16 in the year 2001. On the basis of last census report 79.14% people are literate in Chakdaha Municipality. Obviously the percentage has increased in last 5 years.

43 Primary schools are operational in Chakdaha Municipality. The basic features of 30 primary schools out of 43 are as follows.

Table 2: Basic features of Primary Schools

No. Of Primary Schools	30
No. Of Students	3960

The Supply Demand Gap and Requirements

Particulars Requirements

Housing: Dwelling Unit provision for Households with standard provisions:

- 1 Multipurpose Room
- 1 Bed Room
- 1 Kitchen
- 1 Toilet
- 1 W.C

Physical Infrastructure Requirement: Standard Infrastructure Provision for

- Road protection wall
- Drainage
- Roads

Project Development Option

In-situ redevelopment and whole of the project will be addressed in the project

Proposed Development

Based on preliminary understanding, the following components are being proposed

- Housing Units [Single storied in situ].
- Standard Physical Infrastructure to be provided in the form of Drainage, Roads.

Innovations proposed in Project Planning Background

Housing activities are known to have the capacity to play a significant role in social-economic development, because they help not only in creation of shelter for the people but also in generating employment opportunities for a large variety of skilled and unskilled work force which is a prerequisite

for growth and development of settlement. A considerable section of the people without land are in a still worse position as housing schemes for the poor have hitherto been targeted on paper but not applied in practice. Both the serviced land and shelter have become beyond the reach for half of the population - hence the formation of slums, encroachments, informal colonies and unauthorized constructions. No land is earmarked for Economically Weaker Sections and Low Income Groups in Master Plan. The population density norms are required to be relaxed to enable better utilization of valuable land, as certain areas in the city. This growing slum population and the lack of basic facilities like water and sanitation will badly impact on overall development and prosperity of urban centres like Municipality.

To overcome the existing situation and to promote planned development the following innovative strategies can be adopted for the improvement of the city.

- To ensure that housing, along with the supporting services is treated as a priority and at par

with the infrastructure sector.

- Forging strong partnerships between private, public, and cooperative sectors to enhance the capacity of the construction industry.
- Organizing public consultations to meet the special needs of slum dwellers.
- Promotion of livelihood for the slum dwellers.

Financial Implementation:

Beneficiary led Participation: implies development of housing by involvement of Beneficiary

Tasks:

- Composition of beneficiaries and organizing the area meetings.
- Involvement of community and sustainable livelihood framework (SLF) in decision making and prioritization of needs of the slum.
- Under stating of Social-economic profile

Post Project Monitoring

A Monitoring & Evaluation team has to be formed to know the post project impact on the slums and to document the best practices.

Physical Infrastructure

Background

The National Sample Survey Organization (NSSO) in the Ministry of Statistics and Programme Implementation, Government of India has released the report of a nation-wide survey carried out by it during July 2008 to June 2009 (65th round) on the condition of urban slums.

The aim of the survey was to collect information on the present condition of the slums and on recent changes, if any, in the condition of facilities available therein. Both 'notified slums'—areas notified as slums by the Municipalities, corporations, local bodies or development authorities and non-notified slums were surveyed and non-notified slum being any compact urban area with a collection of poorly built tenements, mostly of temporary nature, crowded together usually within inadequate sanitary and drinking water facilities in unhygienic conditions. The present report gives the condition of urban slums, covering ownership, area type, structure, road within and approaching the slum, living facilities like electricity, drinking water, latrine, sewerage, drainage, garbage disposal, and distance of slums from the nearest primary school and government hospital/health centre. It also estimates the

proportion of slums where certain specific facilities have improved/deteriorated over the five years preceding the date of survey.

Comprehensive data on this subject was last collected by NSSO in its 58th round (July–December 2002). The present report provides key indicators from the 58th round as well, for comparison. Some important findings of the survey are given below.

- About 49 thousand slums were estimated to be in existence in urban India in 2008-09, 24% of them were located along *nallahs* drains and 12% along railway lines.
- About 57% of slums were built on public land, owned mostly by local bodies, state Government, etc.
- In 64% of notified slums, a majority of the dwellings were pucca, the corresponding percentage for the non-notified ones being 50%.
- For 95% slums, the major source of drinking water was either tapped or tube wells.
- Only 1% notified and 7% non-notified slums did not have electricity connection.
- About 78% of notified slums and 57% of the non-notified slums had a pucca road inside the slum.
- About 73% notified and 58% non-notified slums had a motorable approach road.
- About 48% of the slums were usually affected by water logging during monsoon—32% with inside of slum waterlogged as well as approach road to the slum, 7% where the slum was waterlogged but not the approach road, and 9% where only the approach road was waterlogged in the monsoon.
- The sanitary conditions in the slums in terms of latrine facility during 2008-09 showed considerable improvements since 2002. Latrines with septic tanks (or similar facility) were available in 68% notified and 47% non-notified slums (up from 66% and 35% respectively in 2002). At the other extreme, 10% notified and 20% non-notified slums (down from 17% and 51% in 2002) did not have any latrine facility at all.
- About 10% notified and 23% non-notified slums did not have any drainage facility. The corresponding proportions in 2002 had been 15% for notified and 44% for non-notified slums. Underground drainage systems or drainage systems constructed of pucca material existed in about 39% notified slums (25% in 2002) and 24% non-notified slums (13% in 2002).
- Underground sewerage existed in about 33% notified slums (30% in 2002) and 19% non-notified slums (15% in 2002).
- Government agencies were collecting garbage from 75% notified and 55% non-

notified slums.

at least once in 7 days in 93% notified and 92%

notified and 23% non-notified slums did

mechanism for garbage disposal.

Among these slums, garbage was collected

non-notified slums. About 10%

not

have any regular

- Over the last five years, facilities had improved in about 50% of notified slums in terms of roads (both within-slum road and approach road) and water supply. The incidence of deterioration of any of the existing facilities in notified slums during the last five years was quite low (about 6% or below).
- In case of most slum facilities—sewerage and medical facilities being exceptions—the facility was reported to have improved during the last five years in more than 20% of non-notified slums. Deterioration of any of the existing facilities in non-notified slums, like notified slums, was rare (about 9% or below).
- Facilities such as street light, latrine, drainage, sewerage and medical facilities were each reported by more than 10% of notified slums to be non-existent both at the time of survey and five years earlier. In case of non-notified slums, facilities like street light, latrine, drainage, sewerage and garbage disposal were each reported by more than 20% of the slums to be non-existent, both during the survey and five years earlier.
- Where improvement had been brought about during the last 5 years, it was due to the Government's efforts in about 80-90% of slums, both notified as well as non-notified and for all the facilities. Improvement in educational facilities at primary level was attributed to NGOs in 13% of the notified slums where such improvement was reported. NGOs were also found to have played a role in the improvement of latrine and sewerage system in non-notified slums.

Drainage and Solid waste management

Proposal Rationale

The status of adequate Drainage has a close and direct link with environment, water supply and its cleanliness, health and hygiene. The problem of adequate drainage associated with steep influx of population in urban areas, therefore need to be addressed forthwith, debated and deliberated at length, by the policy planners for the development of urban/city areas. Inadequate Drainage results in accumulation of stagnant water and is a major health hazard for the people living in the region.

In the slums there is no proper drainage system and hence stagnation of water is a common occurrence for the slums. In order to improve the situation, there is a need for constructing pucca drains, which will dispose of the stagnant water to the main drains.

Outcome

The proposed drainage system by means of construction of new drains and improvement of existing will help to provide relief to the slum dwellers by means of efficient and effective disposal of storm water through the outfall channels. The outcome of this scheme will by and large enhance the quality of civic life by way of promotion and safeguarding the public health and environmental pollution.

Assessment Overall State of Infrastructure

One of the priority areas identified for Wood Industries slum has been absence of adequate drainage. Most of the drainage is kutcha and inadequate for covering the slums which had led to water logging which in turn affected the environment and health of the people on an overall basis.

As mentioned above poor drainage system and consequently chronic water logging are the major issues of concern. There is hardly any pucca drain. The state of drain also affects the condition of the road.

Though there are storm water drains on the main road around the slums, but there is no systematic connection with the internal areas of the slum, thereby leading to acute water logging within the slum. It is worth mentioning that apart from lack of drainage network in several slum pockets, major challenge lies with its maintenance.

In numerous cases drains in slums get choked due to improper disposing of solid waste and other hazardous materials into the existing drains.

Situation gets beyond control particularly during monsoon season like July and August. Accumulated water causes to generate public health problems. Haphazard growth and settlement in the slum area has blocked the natural drainage courses, which in turn causes water logging and stagnation in different parts of the slum.

Proposed Interventions

It is thus proposed to have an integrated drainage programme covering the slum pocket. The programme shall envisage construction of pucca drain throughout the road length and installing a maintenance programme to ensure that the drains are kept free from clogging from plastics and other materials. Depending on the availability of space and requirement, sections have been designed, Design of which have been provided in the relevant sections.

Road Infrastructure

Proposal Rationale

A key component of the Proposal is a focused initiative to provide strong connectivity and provision of movement in the slums. This will enable the poor people to benefit from greater mobility and would increase their employment opportunities, open up trading and marketing of products, and important improve access to health, education, and other social services.

Roads in the slum are highly undeveloped and ill maintained. Poor roads are a strong barrier to the development of the slums. Poor road condition and absence of road facility in several slums makes life difficult for all slum dwellers, especially, women and children. It also hampers prompt movement of sick; particularly those who require urgent medical attention. Lack of maintenance, coupled with poor drainage makes life even worse during monsoon season. Roads are rarely re-built or re-paired periodically due to several reasons. Provision of basic quality road is thus an important element of slum development. The existing road network system of the slum has become inadequate to cope up with the present and ever increasing needs. In order to bear the additional pressure due to enhanced civic, economic and commercial activities of the slum, existing road network system in several places are required either to be upgraded or widened and new roads are also to be constructed in a number of places where the network is inadequate.

Proposed status and strategy

The existing condition of the road is poor and causes great hardship to the slum dwellers particularly women and children. The existing roads in the slum areas are predominantly made of brick pavement. These roads are substantially worn out. The lane roads are Kutcharoads. These roads are highly vulnerable and are in a poor condition particularly in rainy season.

One of the major issues is absence of proper maintenance. In view of this it is proposed that the entire road network is to be converted to concrete pavement as concrete pavements are durable and easy to maintain.

The Road needs to be maintained. It is proposed that operation and maintenance and servicing of these roads be done by the Municipality. The Bustee Working Committee shall be the first level of responsibility for ensuring that the pipelines etc. are kept in good order. The project cell of the Municipal Corporation shall carry out the overall operation and maintenance.

Proposed Intervention

All the proposed roads are rigid pavement-cement concrete roads. Rigid pavements are those which possess not worthy flexural strength. The concrete pavement slab can very well serve as a wearing surface as well as an effective base course. Therefore usually rigid pavement structure consists of a cement concrete slab, below which a granular base or subbase course may be provided. Rigid pavements are generally designed and the stresses are analyzed using elastic theory, assuming pavement as an elastic plate resting over an elastic or a viscous foundation.

Construction of Granular sub-

base(GSB)100mmthick.Constructionof100mmthickcementconcrete pavement.

Outcome

After successful implementation of the scheme the slum dwellers will have facilities like pre-school education, adult education, non-formal education and social, recreational activities in the slum area. The community centres would provide the people to gather in, to meet and discuss their problems. It is not just a physical allocation

but a space; where poor people could learn, develop their thoughts and

also could contribute their own skill and labour to make their dream come true. It will also provide the Municipal

Corporation in networking with the urban poor communities in order to exchange information and views.

Definition of Slum for Housing

Different definitions of a slum exist in different statutes and in urban poverty literature. For the purpose of HOUSING SCHEME, it is proposed to adopt the definition given in the 2001 Census, which is as follows:

- a) All areas notified as 'Slum' by State/Local Government and UT Administration under any Act;
- b) All areas recognized as 'Slum' by State/Local Government and UT Administration, which have not been formally notified as slum under any Act;

'Slum' or 'Slum Area' – is a compact settlement of at least 20 households (For NE & Special Category States it is 10-15 households) with a collection of poorly built tenements, mostly of temporary nature, crowded together usually within inadequate sanitary and drinking water facilities in unhygienic conditions.

Situation Appraisal

The people living in the slums mostly have kutcha and semi-pucca housing. In certain cases where pucca housing is available, they are usually in dilapidated condition. The kutcha houses are in very poor condition and require extensive repairs. Most of the houses have tiles on roof. While during the surveys some of the houses have been noted to be in average condition, the quality of these houses is also speedily deteriorating.

Proposed Intervention

In line with the vision to 'Housing for All', an integrated housing programme is proposed to be implemented. The target will be all the slum dwellers in the pocket. In situ single dwelling units are proposed.

Building type	Number of DU
In situ single Unit	600

Building Plan

The buildings are proposed to cover an area of approximate 32 Sq.mt along with provision of 2 rooms, kitchen and sanitation facility. The layout, size and type of design of housing dwelling units depend on the local conditions and the preferences of the beneficiary. The houses, has been designed in accordance with the desire of the beneficiaries, keeping in view the climatic conditions and the need to provide ample space, kitchen, ventilation, sanitary facilities, etc. and the community perceptions, preferences and cultural attitudes.

In line with the scheme, carpet area of the house will be not less than 25.37 sq.mts and preferably two room accommodation plus kitchen and toilets should be constructed.

Building material

- PCC(1:3:6) for foundation
- RCC M-20 for substructure & superstructure (Column, Beam, Slab)
- HYSD Steel
- 1st class Brick Masonry
- 1:6 (Cement: Sand) plaster – 10 mm on soffit of beam & slab, 15 mm on internal walls & 20 mm on external walls
- IPS flooring

Structural Design

- Following are the general considerations in the analysis/design.
- For all structural elements, M20 grade concrete and Fe415 grade of steel is used.
- Plinth beam passing through columns are provided as tie beams.
- Pedestals are proposed up to ground level.
- Beam Centre-lined dimensions are followed for analysis and design.
- For all the building, wall of 250mm and 125mm thick with 20mm External plaster and 12mm thick internal plaster are considered.
- Seismic loads are considered acting in the horizontal direction along either of the two principal directions.

Design data

- Live load: 2.0 kN/m² at typical floor
- 1.5 kN/m² on terrace (With Access): 0.75 kN/m² on terrace (without Access)
- Floor finish 50mm (0.05*24) = 1.2 kN/m²
- Ceiling plaster 12mm (0.012*20.8): 0.25 kN/m²
- Partition walls (Wherever Necessary): 1.0 kN/m²
- Terrace finish: 1.5 kN/m²
- Earthquake load: As per IS-1893 (Part 1)- 2002

- Depth of foundation below ground: 0.7m
- Walls: 250mm thick brick masonry walls at external and 125mm walls internal.

Reference codes:

- IS 456:2000-Code of practice-Plain and Reinforced concrete.
- IS: 1893:2002- Criteria for Earthquake resistant design of structures (Part-1)
- IS: 13920:1993- Ductile detailing of Reinforced concrete structures subjected to seismic forces.
- SP:34 - Handbook on Concrete Reinforcement and Detailing.
- S:875:1987-Code of practice for design loads (other than earthquake) for buildings and structures. (Part-2)

Identification of Beneficiaries

Municipality Municipal Corporation, in consultation with State Urban Development Agency (SUDA), will approve the phasing of the beneficiaries in the region. The beneficiaries so identified and the projects so prepared shall be done in consultation with the committees and community development societies already existing in that particular city. The identification of beneficiaries will be on the basis of the baseline survey already conducted under PMAY Demand Survey.

Allotment of Houses

Allotment of dwelling units will be in the name of the female member of the household. Alternatively, it can be allotted in the name of husband and wife jointly. Ownership of land required for every Beneficiary.

Town Planning Norms

Up-gradation of existing constructions and construction of new houses shall only be taken after approval of the layout by the urban local body. Respective State Govts. may relax some town planning norms for sanction of such layout Plans, to facilitate HOUSING SCHEME, however, minimum acceptable standards of Town Planning will need to be set and followed.

All planning is done as per UDPFI & CPHEOD guidelines and local Municipal Bye-laws.

Compliance with Municipal Byelaws

All designs & drawings are created keeping in line with the municipal byelaws.

Tenure

Unlike rural areas, land is scarce in urban areas particularly in large metropolises.

for providing land for the project rests with the State Government or its agencies.

Summary of Investment

Project Costing

The costing for the individual sector has been made on the basis of applicable Schedule of Rates. The details of each of the sub-projects have been provided in the respective sections.

The cost components include:

Infrastructure: Cost of infrastructure development/up-gradation including water supply, stormwater drainage, roads (BT & CC) & drainage, etc.

Housing: Construction Costs would need to be arrived from the various components that are proposed to be implemented and would vary depending on the development option identified.

GOI Contribution:

PMAY scheme guidelines stipulate that, 1.5 lakhs of the unit cost of dwelling unit.

The Central share would be available as per milestones set out in Memorandum of Agreement (MoA).

Beneficiary Contribution:

In order to ensure beneficiaries' interest, financial contribution by the beneficiaries is critical. The share of beneficiary contribution in housing is proposed to be a minimum of 25000/- . As per PMAY guidelines no contribution from the beneficiaries is expected in infrastructure improvements.

State Contribution:

The decision would be left to the remaining share would have to be arranged by the State. State will contribute 5% of total Dwelling cost for infrastructure.

ULB Contribution:

ULB have no contribution on dwelling unit cost. ULB will contribute 5% of total Dwelling cost for infrastructure.

In the 1st Meeting of SLSC of West Bengal it has been decided that the following funding pattern should be adopted for implementation of PMAY until further revision.

Type of City / Towns as per 2011 census	Component	Contribution of			
		Centre Rs.(Lakhs)	State Rs.(Lakhs)	ULB Rs.(Lakhs)	Beneficiaries Rs.(Lakhs)
Total cost of Beneficiary LED Construction	Housing	1.5	1.92858	Nil	0.25
	Infrastructure	Nil	5 %	5 %	Nil

Project Cost and Financing Strategy

For Dwelling Unit

Total no of Dwelling unit = 600 Nos

Rate per Dwelling unit = 3.67858 say 3.68 Lakhs

Total Cost of Dwelling unit = $600 \times 3.68 = 2208.00$ Lakhs

Central Share = 600×1.5 Lakhs = 900.00 Lakhs

State Share = 600×1.93 Lakhs = 1158.00 Lakhs

Beneficiary Share = 600×0.25 Lakhs = 150.00 Lakhs

ULB Share = NIL

For Infrastructure

10 % of total Dwelling unit cost = 2208.00 Lakhs $\times 10\% = 220.08$ Lakhs

Central Share = NIL

State Share = $50\% \times 220.08$ Lakhs = 110.04 Lakhs

Beneficiary Share = NIL

ULB Share = $50\% \times 220.08$ Lakhs = 110.04 Lakhs

The total project cost will be 1939.00 Lakhs

Out of these 1762.72 lakhs is the cost of Housing Infrastructure. The following table shows the share of cost between housing infrastructure & Physical Infrastructure.

Cost Breakup between Housing & Infrastructure

S.No.	Component	Cost in Lakhs
1.	Housing Cost (479) Dwelling Units	1762.72
2.	Infrastructure Cost	176.27
Total		1938.99

Sectorwise Monitoring and Implementation Plan

Background

A strong implementation plan and administration framework is essential for implementation of the identified projects that require strengthening of the Municipal Corporation and evolution of a Community Structure.

Accurate assessment of investment requirements and devising a suitable financing strategy are the key components of any sustainable slum rehabilitation program. Implementing bodies must

recognize and measure the various costs of developing infrastructure and housing, including the costs for subsequent maintenance.

As the scheme is a collaborative effort of multiple stakeholders, with a few of them contributing financially as well, it is important to estimate the required capital expenditure for developing the infrastructure and improving the housing stock as accurately as possible.

National Level

PMAY Mission Directorate

There shall be a PMAY Mission Directorate under the charge of a Joint Secretary under the Ministry of

Housing and Urban Poverty Alleviation, supported by staff and a Programme Management Unit with experts having expertise in the areas of survey and statistics, computerization and MIS, Planning, Project engineering, Social development, Monitoring and evaluation etc. for ensuring effective co-ordination with State Governments for expeditious processing of the State Slum-free PoA and project proposals and providing handholding support to States/UTs.

State PMAY Mission Director

The State Level Nodal

Agency for PMAY/SUDA, West Bengal will have coordination of all scheme and reform-related activities more than one department handling urban development, Local self-government, and Housing. SLNA. The Mission Directorate supported by a team of dedicated professionals having expertise in the fields of GIS, MIS, town planning, community development, project engineering, capacity development etc

Chakdaha Municipality

The Municipality shall act as the implementation agency for the project. Keeping in mind the criticality

of the project, a dedicated '**Bustee Works Management Committee (BWMC)**' has been setup for implementation and operation & maintenance (O&M) of the proposed infrastructure under the scheme.

The BWMC will have representatives of local councilor, Chairman-in-Council, municipal engineers, town project officer, community organizers and member from the local slum dwellers. Some of the responsibilities of BWMC are listed below:

- i. Delineation of poverty pockets in this town to execute the scheme.
- ii. Recruitment of community organizers
- iii. Guiding and assisting the community organizer to form neighborhood group (NHG) and for identification of RCVs.
- iv. Formation of NHCs and CDs.
- v. Constitution of town level planning and monitoring committee (TLPMC).
- vi. Liaison with CMOH and other concerned district level officers and NGOs for conference.
- vii. Regular contact with SUDA and Department of Municipal Affairs.
- viii. Convening meeting of TLPMC to take stock of programme implementation and convergence.
- ix. Dovetail all poverty alleviation programmes with IHSDP.
- x. Obtain regular feedback from CDS and send the required monthly progress report to SUDA by the end of first week of the next month in the prescribed MIS format.

Participation through Beneficiary committees

People's participation in municipal planning and development is critical and shall be ensured through Ward Committees in each ward irrespective of their population and size. The Ward Committee Rules have also been framed in such a way so as to ensure involvement of the members of the Ward Committees in the overall municipal administration and resource mobilization. The Ward Committee created especially for the purpose of PMAY will be headed by the Councilor of

the Ward, who would in turn submit the report of progress to BWMC.

Some of the responsibilities the Ward Committee will be:

- i. Supervision of the physical progress of the work under the project
- ii. Designating in-charge, who would be held responsible for individual scheme under the project
- iii. Collecting user charges for operation and maintenance (O&M) activities
- iv. Ensuring proper maintenance of each of the assets that is created under the project

Participation through Community Based Organization

Participation of poor families in planning and implementation of slum level Basic Infrastructure Development as well as Socio-Economic Development has been ensured through formation of Community Based Organization. The Ward Committee will also have representative of weaker community. Similar structure have also been involved by the municipalities in providing civic services like conservancy services, maintenance of street light, etc. municipal administration and resource mobilization.

However, basic guidelines, which will be followed in implementation of the projects, are been laid down below:

Social Infrastructure

In order to provide preventive healthcare, mother and child care, supplementary nutrition, referrals and soon, a cost effective but sustainable community infrastructure or institution need to be developed.

In the first step, community health facilities will be provided from centrally located Community Seva Kendra in slum pockets and for different type of imparting education and other training purpose, Community Centre will be put in place.

The Community Seva Kendra will be the hub of all activities of the Unit like: immunization, health-checkup of pregnant women, growth monitoring, referrals, nutrition supplementation, awareness training and campaign and soon, besides other activities like Balwadi, NFE, cultural activities etc. Some part time medical staff may be posted for these Units in the slum pockets and some help from trained medicos will be needed for services like health checkup of pregnant women and children, and immunization.

Thus notwithstanding the guidelines in this regard, following alternatives will be tried:

- Creation of a dedicated cell for administrative activities and maintenance of the Community Seva Kendra

- Assistance from some NGOs like Rotary, Lions, IMA, etc.
- Request to the district outfit of the Health and Family Welfare Department to deputed doctors to the UHC by rotation for 2-3 hours, three times a week.
- Engage duly certified inoculators or health workers for immunization only on the basis of token honorarium.
- Engage private medical practitioners who are motivated to provide service to the poor community and pay them token honorarium in recognition of their service.

Physical Infrastructure

The Ward Committee will not only be supervising and monitoring the progress of the activities, but shall be actively involved in scheme implementation and in mobilization of funds. The Ward Committee will have teams for individual physical infrastructure projects who shall be held responsible for the scheme in the slums in the ward. Primary activity of the Committee for schemes is provided below in details.

- i. Assess water supply needs and identify spots for tap.
- ii. Develop water supply plan.
- iii. Train RCVs in hand pump maintenance.
- iv. Develop slum level water and sanitation committee.
- v. Test water quality periodically.
- vi. Construct platform around each hand pump that does not have it already.
- vii. Identify needs for community bathing cubicles for women and selecting ideal spot for constructing the same
- viii. Identify sites for building community toilets cum water points.
- ix. Link community toilets to biogas plant (on experimental basis).
- x. Improve the condition of drains; soak pits and solid waste disposable bins.

Other Environmental Improvement Measures

- i. Organise hygiene and sanitation drives in slums.
- ii. Sports, games and cultural activities
- iii. Encourage local NGOs/clubs to create facilities for games and athletics for the children and youth.
- iv. Give support to the above by providing materials for games, etc.
- v. Organize annual sports and tournaments.
- vi. Organize facilities for learning music and dramatics.
- vii. Organize annual competition of music, recitation, drawing, drama, etc.

Creating income and employment opportunities for women

- i. Identification of marketable skills for women.
- ii. Arrange skill training with fund available under SUME of NRY.
- iii. Arrange credit-subsidy under SUME to enable the trained women to start and operate micro enterprise.
- iv. Arrange for supply of inputs and marketing of finished products.
- v. Thrift and Credit Society Formation
- vi. SHG Formation
- vii. DWCUA Formation

Housing

Monitoring

Officers dealing with HOUSING SCHEME at the State headquarters shall visit the slums regularly and ascertain through field visits whether the programme is being implemented satisfactorily and whether the construction of houses is in accordance with the prescribed norms. As per schedule of inspection which prescribes a minimum number of field visits for each supervisory level functionary from the State level to the corporation level shall be drawn up and strictly adhered to.

Evaluation Studies

Periodic evaluation studies on the implementation of HOUSING SCHEME shall be carried out by reputed institutions and organizations on issues identified during concurrent evaluation and reviews.

Copies of these studies should be furnished to the Govt. of India. Remedial actions shall be taken on the basis of the findings of these studies.

Modality of implementation

Before implementation it will be ascertained that either the property title is in the name of the female member of the family or at least the female family member is the co-owner of the holding/property.

Transparency in implementation of Housing Scheme

The list of items on which information would be made available to people to bring about greater transparency at the State, District and Corporation levels is given below:

- i. List of people below poverty line in the urban area.

- ii. List of beneficiaries identified during the preceding year and current year including details of SC/ST, BC, women beneficiaries and physically and mentally challenged persons under HOUSING SCHEME. Allocation made to the State under VAMBAY
- iii. Guideline of HOUSING SCHEME/Criteria for selecting beneficiaries.
- iv. Display of HOUSING SCHEME signboard/ logo on the allotted houses.

Monitoring & Evaluation

PMAY will be monitored at three levels: City, State and Government of India. In particular,

- Ministry of Housing and Urban Poverty Alleviation will periodically monitor the scheme.
- State Nodal Agency would send Quarterly Progress Report (on-line) to the Ministry of Housing and Urban Poverty Alleviation.
- Upon completion of a project, the State Nodal Agency, through the State Government, would submit completion report to the Central Government.
- Central Sanctioning-cum-Monitoring Committee will meet as often as required to sanction and review/monitor the progress of projects sanctioned under the Mission.
- States/Cities will be facilitated through independent quality control/assurance/third party teams at various levels that may be outsourced to specialized/technical agencies.
- Monitoring of projects by States/Urban Local Bodies by conducting Social Audit in conformity with guidelines to be prescribed, right from the stage of project preparation.
- The processes of implementation will be monitored by undertaking concurrent evaluation through reputed independent institutions to ensure that corrections to distortions, oversights or shortcomings can be made in time.

Convergence of Health and Education

Health

Development Objectives for the Health Care Service Delivery Improvement Plan. Some of the development objectives, which the Birnagar Municipality addresses through their Health Care Service Delivery Improvement Plan, are as follows:

Theme 1: Public Health Services:

- i. Better coordination with State Government hospitals and dispensaries for maintaining a

- betterreferralsystem.
- ii. Improve the asset and human resource utilization pattern of health services such as ambulanceservices,dispensariesetc.
- iii. Ensurethataltypesofcooked/uncookedfoodintheMunicipal Corporationareaaresoldbylicensed foodsellersto preventsreadofdiarrhoealandotherdiseaseinthearea.
- iv. StrengtheninganddevelopingHealthManagementInformationSystem.
- v. Exploring opportunities for strengthening decentralization and other public private partnershipsinprovidingsuchpublichealthservices.
- vi. Partnerwithleadingprivatesectorprovidersofmedicalservicesforbetterutilisationand maintenanceof medicalinfrastructuresuchas municipaldispensaries,maternityhomes.

Theme2: ReproductiveandChildHealthCareServices:

- i. To establishqualityantenatalcareto 100%oftheslumwomen.
- ii. To establish100%institutionaldeliveryforall womenlivinginslums.
- iii. 100%immunizationofinfantsagainstsixkillerdiseaseswithin12 monthsofbirth.
- iv. Making sterilization services available by way of improving efforts related to family planning.
- v. FormulateawiderbasketofservicesaimedatprovidinghealthprioritieswithintheRCH domainthathavenotbeenadequatelyaddressed,aswellassomehealthprioritiesoutside theRCHdomainwhicharemajorcontributorstotheburdenofdiseaseandimpoverishment areincluded.
- vi. Spreadinghealthawarenessthroughvariousmethodsofcommunicationnotonlytothe beneficiariesoftheProgrammebut alsoto theexcludedgroupsand areaswithinthewards.

AllotherGovernmentProgrammesforPreventiveHealthCareandotherIndependent InitiativestakenbytheULB:

- i. Promotionofhygienicmeasurestoleadto reduceddiarrhoealdiseasewithpromptand appropriatecareandreducinghouseholdexpenditureonrecurrentdiarrhoea.
- ii. Increasethecoverageofvectorcontroloperationsbyrationalizingtheuseofassetsand humanresourcesavailable.
- iii. Effectiveimplementationof GovernmentProgrammesto achievethe targetedgoalsand objectives.
- iv. Thefollowingschemesunderimplementation bytheStateGovt.inthesocialsectorcanbe dovetailedandintegratedwiththeIHSDPProgramtoensureeffectiveslumdevelopment.

The SocioEconomic Survey has already identified beneficiaries under the scheme.

Education

The Municipal

Corporation has been actively implementing key initiatives in the Education sector through convergence with the following objectives:

- i. Improvement Of the Status & Infrastructure & Basic Service in Primary Schools under Municipal Corporation.
- ii. Achieving 100% enrolment in schools for next 5 years.
- iii. Enhancing the quality of education provided in primary school with respect to student performance & teaching quality.
- iv. Leveraging the existing resources created under the NSDP and other programme and increase the coverage in excluded committee and squatter settlements
- v. Achieving higher enrolment of children in age group of 6-14 in SSK centres
- vi. Strengthening Parent Teacher Association and involving community participation in improving the performance of school
- vii. Creating awareness in the community through the existing community structures (NHG, NHC, CDS members) on the importance of primary and adult education.

Extensive training programme for teachers & sahayekasis being organized for improvement of quality teaching. Construction, extension and repair of SSK buildings must be done so that a greater portion of children aged 5 to 14 yrs. can attend there.

SSA: 'Sarba Siksha Abhiyan' – a scheme meant for 'education for all'

SSK: 'Sishu Siksha Kendra' – Mainly aimed at offering free primary education to the poorer section of the community.

Mid-day Meal: A program initiated to centralize the drop out rates, has been found successful since its initiation.

Social Security

The following Social Security Schemes under State Plan are proposed to be integrated with the current program through convergence:

Adult Education: To promote self-dependability.

Thrift and Credit Society: For easier credit and finance availability.

Self Help Group: To promote self and micro entrepreneurship.

DWCUA: Upliftment of the lifestyle and self-independency of Women Group.

Annapurna: To provide food stock at reduced price to the poorer section of the Community.

Antyodaya Anna Yojana: To provide food stock free of cost to the older section of the community.

Environment Impact Assessment

IMPACT & REMEDIES

1.	Utilization of alternative material Characteristics and availability of alternative material	Locally available bricks etc. will be used.
2.	Rehabilitation of water bodies & measures for maintaining surface runoff smoothly	No water body is affected by the alignment of road. The road side open C. C. / Brick masonry drains have been provided for free flow of storm water.
3.	Measures for Erosion Control	Not applicable for the slum area.
4.	Conservation of Topsoil a. Extent of loss of topsoil b. Area requirement for topsoil conservation c. Inclusion of conservation of topsoil d. Impact on Heritage & Culture e. Identification of locally significant cultural properties f. Assessment of likely impacts on each cultural property due to project implementation g. Possible measures for avoidance	Not applicable for the slum area.
5.	I. Identification of alternative routes II. Relocation of Culture property in consultation with the local community III. Common Property	Question does not arise.
6.	Location of Natural Habitants	It will not be disturbed
7.	Construction of site office / Camp	Temporary construction of camp / office shall be established by contractor and since the project is small and scattered, the temporary impact on environment for

		Construction Camp / office at the time of execution of work is negligible.
8.	Quarrying of Materials	
	a. Sourcing of materials from quarries b. Lead from various existing quarries c. Adequacy of material for the project in these quarries	The construction materials require for the project shall be procured from : i. Stone metal: from the existing. ii. Bricks: From the existing brick fields nearby the project site. iii. Sand: From the nearest source. b. All the materials are sufficiently available.
9.	Water Requirement; Identification of potential sources of water	Water required for the construction of work will be available from ground water. There is no scarcity of water in the region.
10.	Location of Waste Water Disposal :	
	a. Location for disposal of waste water	The surface drain has been proposed in the slum for disposal of waste water.
	b. Outfalls locations for longitudinal drains i) Outfall level and back flow ii) The outfall is in natural stream; measures shall be taken to prevent sediment into the stream.	Natural slope of the ground will be maintained for waterways for discharge of surface runoff. No possibility of back flow except in the case of heavy flood. The storm water drain of the slums will discharge the water to the main high drain of the town.
11.	Air Pollution during construction work	Work shall be carried out by equipment's like concrete mixer machine vibrator etc. at this time of concerting work only for which air pollution will be negligible.
12.	Identify locations susceptible to induced development	Locations vulnerable to induced development: In such location the Municipality has committed not to allow building construction activity. a. Lands within 50 m of junctions b. Agricultural lands with enforce restriction on building activity on either side of road. Stretches within 100m of worship places, weekly fairs and locations of community mass gatherings.
13.	Roles and responsibilities of Municipality in regulating development	The Municipality shall lay down restrictions on building activities along the by-pass roads : 1. Municipality will enforce restriction on building activity on either side of road. 2. Development of Residential sites outside Existing Settlement. Appropriate measure towards the removal of encroachments onto the public land to be taken.
14.	Traffic Congestion and related air & noise pollution	As the road passes through the slum area of the town and two wheelers, Three wheelers, light vehicle will move hence there will not be any traffic congestion,

		related air & noise pollution.
15.	Opportunity in economic activities due to ease of transportation system	The benefits due to this project are : 1. Generation of Man days 2. Improvement in Household or population sector i.e. Improvement of personal health, hygiene, socio- economic condition, education etc.

Operation&Maintenance

FormulationandImplementationof"OperationandMaintenancePlanforSlum Level Infrastructure work"

Background

Itisrecognizedthattheassetscreated inslumsarerequired tobeproperlyusedandmaintained.Forthispurpose,'OperationandMaintenancePlan'forthe slumisbeingprepared

Formulation and implementation ofO&MPlan

1. Theassetscreatedinprojectareaarerequiredto beproperlyusedandmaintained.
2. Thefollowingsteps willbetakenpriortopreparationofthe'OperationandMaintenancePla n' foreachslum:
 - i. TheULBalongwiththeCDSworkingintheSlumwhereinfrastructureworkswere performedwillarrangeameeting(1st)withall slumdwellersoftthatparticularslum.
 - ii. AtthismeetingtheLocal Councillor,Chairman-in-CouncilorChairman-in-Councilof slumdevelopment work,MunicipalEngineers,TownProjectOfficer,Community Organiser, CDSmembersandRCVsoftthatparticularslumwillbepresent.Other members/ officialsasfeltnecessarymayalsobepresent.
 - iii. At thismeetingthe needforformationof Bustee WorksManagementCommittee (BWMC)forlookingafter,OperationandMaintenance PlanforSlumLevel Infrastructurework'willbeexplainedto theslumdweller.

- iv. The stock of work done and assets created under slum level infrastructure work of that particular slum will be listed at this meeting.
- v. At this meeting the ULB will brief the slum dwellers about the constitution, role and functions of the BWMC.
- vi. A similar next meeting (2nd) will be held at which the BWMC will be elected as per constitution through informal election. If one meeting is not sufficient more such meetings may be arranged.
- vii. Minutes of each meeting with signature of the participants should be maintained.

Constitution & functions of the Bustee Works Management Committee (BWMC):

- i. The BWMC will consist of minimum 5 members, all of whom will be residents of that particular slum.
- ii. In addition, one RCV from that slum will be member.
- iii. There will be at least two female members in the BWMC.
- iv. The members of the BWMC may be from BPL/ APL or both.
- v. At least one member will belong to a Neighbourhood Group (NHG) from that slum.
- vi. The BWMC will be elected through an informal process of election.
- vii. There must be good publicity to ensure wide attendance.
- viii. At least 40% of slum dwellers must be present in the meeting during election of BWMC.
- ix. The BWMC will be an independent body. The ULB will be responsible for overseeing the work of BWMC.
- x. The BWMC will hold office for a period of two years, after which a new committee will be elected. If any member resigns or moves out of the slum or is incapable of functioning for any reason, another member will be elected in his/her place within one month.
- xi. Each BWMC will open and operate a separate bank account. This bank account will function as the O&M fund for that slum.
- xii. The BWMC will be authorized by the ULB to raise funds for O&M as is elaborated under item no. 13.
- xiii. The ULB will make matching contribution against the fund raised by the BWMC through user charges to encourage the process.

- xiv. The BWMC will report to the slum dwellers in a meeting held once in six months on revenue, expenditure and maintenance issues. This meeting will be attended by Local Councillors, ULB Officials & Engineers, Community Organizer, Town Project Officer, CDS member.
- xv. There must be an agreed upon O&M Plan between the ULB, CDS and BWMC for the assets created in that particular slum under IHSDP as listed in 1st meeting.
- xvi. They will need interim hand holding which will be extended by the ULB by providing their technical person and accounts person for technical and accounts support. Otherwise the ULB can take help of local NGOs/ CSOs for providing support to BWMC.
- xvii. Chairman, Secretary and Cashier will be selected within the BWMC. Bank account will be operated by any two of them jointly.
- xviii. The existing Beneficiary Committee will cease after the BWMC is formed.

Maintenance: Water Supply: Routine maintenance

- a) Daily cleaning
- b) Petty repair
- c) Periodical testing of water

Petty repair involves mainly replacement of street stand posts, repairing of hand pump and platform.

It is to be ascertained by the ULB/Bustee Works Management Committee (BWMC) how much money is roughly required per month for meeting the cost of this petty repair, daily cleaning and periodical testing of water. The cost of petty repair works and daily cleaning is to be met from collection of fund from the Beneficiaries.

The Bustee Works Management Committee (BWMC) will supervise this, 'Daily cleaning and petty repair work'.

Sanitation: Community latrine

Daily cleaning and petty repair work:

- It requires daily cleaning (once, twice or more) by engaging a sweeper on contract.
- Replacement of Bibcock and other petty repairing work

It is to be ascertained by the ULB/BWMC as to how much money is required per month for carrying out the work of item (i&ii). The cost of item (i&ii) is to be met from ULB fund/Beneficiary Contribution /or a combination of both in every month. This decision may be taken. The BWMC is required to collect the contribution from Beneficiaries every month and supervise the work.

Major repair and maintenance work:

Periodical maintenance of latrine structure by
way of plastering, colour washing, door, window, floor
repairing, replacement of broken (W.C.) pan, cleaning of septic tank etc

Major repair and maintenance work will be implemented by the ULBs from their fund by engaging CDS/ contractor or ULB staff.

Drainage:

Petty repair, operation and maintenance:

It requires cleaning at least once or twice in a week and occasional petty repair. This work should be executed by the BWMC, for which the BWMC will first decide how much money will be required in every month for getting this work done. Once the amount is ascertained, the ULB will decide whether this expenditure may be fully met from the contribution of the Beneficiaries only or proportionately shared by ULB and Beneficiaries. The BWMC will collect the contribution from Beneficiaries. It is to be decided how the contribution is collected. The BWMC will supervise the work.

Major maintenance and repairing work like plastering, reconstruction of damaged portion and other works may be needed from time to time.

Major maintenance and repairing work will be executed by the ULBs from their fund by engaging CDS/ contractor or ULB staff.

Road:

Maintenance of Concrete paved road: Sweeping, petty repair and maintenance will be implemented by the BWMC for which they will collect contribution from Beneficiaries.

Solid waste management:

1. Daily door to door collection and depositing to the nearby container/ trailer
2. Will be done by the ULB with existing staff. The staff engaged for this work will report to the BWMC who will supervise their work. The BWMC will maintain the attendance of the staff attending the work and report on weekly basis to the ULB regarding their attendance and performance. BWMC will first assess how much money will be required every month. The BWMC will collect the contribution from Beneficiaries every month. BWMC will supervise the work.
3. Transporting from container/ trailer to dumping/ composting ground
4. The ULB will execute the work from their fund.

Duties of BWMC

1. They will maintain registers showing the existing services/ structures under their control:

i. Water supply

- i. What is the length of waterline
- ii. What is the diameter and material of waterline
- iii. How many stand posts are there
- iv. How many small dia-deep tubewells are there and their status (functioning/ defunct)
- v. How many big dia-deep tubewells are there and their status (functioning/ defunct)

They will maintain a register for keeping stock of materials which are often required for day to day maintenance work like bibcock, short pipe for stand post etc.

Institutional Capacity

Municipality Municipality, with its selected local body in place, has developed institutional strength to

implement, operate & maintain proposed infrastructure. The Municipality spreading over an area of 5.52 square kilometres is comprised of 14 wards. With efficient and trained manpower, the Municipal Corporation has developed both

technical and administrative skills. The development of appropriate

municipal organizational structures with qualified staff is essential if municipalities are to provide cost-effective services to citizens. With local

government reform municipalities are required to take on

new tasks, and provide new services. This will only be possible if municipalities have cost-effective and appropriate

structures and staff that are well qualified and highly motivated. The municipalities should plan in such a way so as to ensure that they can meet the needs of citizens effectively and efficiently and infrastructural facilities to the citizens:

- **Solid Waste Management**
- **Birth and Death Registration**
- **Crematoria and burial ground**
- **Prevention of food adulteration**
- **Preventive Health Care and Health Care**
- **Services**
- **Roads and its development**
- **Widening & improvement to roads**
- **Street Lighting**
- **Bus Stands, Public Urinals**

- **Markets**
- **StormWaterDrainageandFloodControl.**
- **ParksandPlaygrounds**
- **Plantations**
- **TownPlanning**
- **SlumImprovementandUrbanCommunity**
- **Development**
- **Education**
- **Water**
- **Beautification**
- **Auditoriums**

DETAILED ESTIMATE FOR THE CONSTRUCTION OF SINGLE UNIT DWELLING HOUSE

Pradhan Mantri Awas Yojana Housing For All (Urban)

Total Covered Area- 32.18 sq.m (With Electrical Works)

Reference of Schedule of Rates : PWD (W.B.), Schedule of Rates Building & Sanitary w.e.f-01.07.2014 & Corrigenda

Floor Area 25.77 sqm

SL No.	Description of Works	Quantity	Unit	Rate (Rs.)	Amount (Rs.)
1	Earthwork in excavation in foundation trenches or drains, in all sorts of soil (including mixed soil but excluding laterite or sandstone) including removing spreading or stacking the spoils within a lead of 75 m as directed including trimming the sides of trenches, levelling, dressing and ramming the bottom, bailing out water etc. as required complete. a) Depth of excavation not exceeding 1500mm . SOR, PWD, P-1, I -2 a	13.000	%cu.m	12047.00	1566.11
2	Earth work in filling in foundation trenches or plinth with good earth in layers not exceeding 150 mm. including watering and ramming etc. layer by layer complete.(Payment to be made on the basis of measurement of finished quantity of work) a) With earth obtained from excavation of foundation. SOR, PWD, P-1, T/3 a	11.120	%cu.m	7831.00	870.81
3	Supplying Laying Polithin Sheets etc. SOR, PWD, P-45, T - 13	22.000	sqm	25.00	550.00
4	Cement concrete with graded Stone ballast (40 mm.) excluding shuttering.a) In ground floor and foundation.6 : 3 : 1 proportion Pakur variety SOR, PWD, Page 24 ; Item -10 a	3.500	cu.m.	5823.00	20380.50
5	25 mm. thick damp proof with cement concrete (4:2:1) (with graded stone aggregate 10 mm. Normal size) and painting the top surface with a coat of bitumen using 1.7 kg. per sq.m. including heating the bitumen and cost and carriage of all materials complete. SOR, PWD, P-45, T-12	6.810	sqm,	297.00	2022.57
6	Brick work with 1st class bricks in cement mortar (6:1) a) In foundation and plinth. b) In super structure SOR, PWD, P-29, T -22(a), (b)	10.430 15.240	cum cum	5719.00 5943.00	59649.17 90571.32
7	125mm thick brick work with 1st. class bricks in cement mortar (4:1). a) In ground floor SOR, PWD, P-73, I -29	23.220	sq.m.	783.00	18181.26
8	Ordinary Cement concrete (mix 1:1.5:3) with graded stone chips (20 mm nominal size) excluding shuttering and reinforcement if any, in ground floor as per relevant IS codes. (i) Pakur Variety SOR, PWD, P-14, T -7(i)	3.940	cu.m.	6851.66	26995.54
9	Reinforcements for reinforced concrete work in all sorts of structures including distribution bars, stirrups, binders etc. including supply of rods, initial straightening and removal of loose rust (if necessary), cutting to requisite length, hooking and bending to correct shape, placing in proper position and binding with 16G black annealed wire at every inter-section. complete as per drawing and direction. (a) For works in foundation, basement and upto roof of ground floor / upto 4m. (i) Tor steel/Mild steel. SOR, PWD, P-27, T -15(I)	0.309	MT	60705.93	18775.74

SL No.	Description of Works	Quantity	Unit	Rate (Rs.)	Amount (Rs.)
10	Hire and labour charges for shuttering with centreing and necessary staging upto 4 m. using approved stout props and thick hard wood planks of approved thickness with required bracing for concrete slabs, beams, columns, lintels curved or straight including fitting, fixing and striking out after completion of works. (upto roof of ground floor). (When the height of a particular floor is more than 4 m. the equivalent floor ht. shall be taken as 4 m. and extra for works beyond the initial 4 m. ht. shall be allowed under 12(e) for every 4 m. or part thereof.) SOR, PWD, P-66, T -12(a) 25 mm. to 30 mm. thick wooden shuttering as per decision & direction of Engineer-in-charge. Ground Floor	37.063	M ²	360.00	13342.68
11	Plaster (to wall, floor, ceiling etc.) with sand and cement mortar including rounding off or chamfering corners as directed and raking out joints or roughening of concrete surface, including throating, nosing and drip course where necessary . In ground floor. A) With 6:1 cement mortar. a) Inside wall 20 mm thick plaster SOR, PWD, P-151, T -2 (i)(b) b) Out side Wall, 15mm th. SOR, PWD, P-151, I -2 (i)(c) B)10mm th ceiling plaster (4:1) SOR, PWD, P-151, I -2 (i)(c)	116.940 111.950 23.330	sq.m. sq.m. sq.m.	181.00 156.00 140.00	21166.14 17464.20 3266.20
12	Neat cement punning about 1.5mm thick in wall, dado, window, sills, floor, drain etc. SOR, PWD, P-152, I -8	26.700	sq.m.	38.00	1014.60
13	Artificial stone in floor,dado, staircase etc. with cement concrete (4:2:1) with stone chips laid in panels as directed with topping made with ordinary or white cement (as necessary) and marble dust in proportion (2:1) including smooth finishing and rounding off corners and including application of cement slurry before flooring works, using cement @ 1.75 kg./sq.m. all complete including all materials and labour. In ground floor. 3 mm. thick topping (High polishing grinding on this item is not permitted) with ordinary cement. 20mm thick SOR, PWD, P-40, I -3 (i)	26.490	sq.m.	265.00	7019.85
14	Supplying, fitting & fixing MS clamp for fixing door and window frame made of flat bent bar, end bifurcated, fixed in cement concrete with stone chips (4:2:1)a fitted and fixed complete as per direction. 40mm x 6mm x 125 mm length. (Cost of cement concrete will be paid separately) SOR, PWD, P-90, I -18 (c)	34	each	22.00	748.00
15	Wood work in door and window frame fitted and fixed complete including a protective coat of painting at the contact surface of the frame other Local wood SOR, PWD, P-85, T -1(i)	0.213	cu.m.	46171.00	9834.42
16	Panel Shutter of door & Window (each Panal Consisting Of single Plan without Join) 25 mm thick shutter with 12 mm thick Panal of size 30 to 45 cm. Other Local wood SOR, PWD, P-105, I -84 (iv)c	8.520	sq.m.	1567.00	13350.84
17	Iron butt hinges of approved quality fitted and fixed with steel screws, with ISI mark. a)75mm x 47mm x 1.70mm SOR, PWD, P-91, T -20(iv)	32.000	each	34.00	1088.00
18	Iron Socket Bolt of approved quality fitted and fixed complete. i) 150 mm long x 10 mm dia SOR, PWD P-93, I -25,c	11.000	each	71.00	781.00
19	White washing including cleaning and smoothening surface thoroughly (5 parts of stone lime and 1 part of shell lime should be used in the finishing coat). Two Coats SOR, PWD, P-155, I -3 (b)	124.960	%sq.m	1887.00	2358.00
20	Colour washing with ella with a coat of white wash priming including cleaning and smoothening surface thoroughly external surface One Coat SOR, PWD, P-155, I -4(ii)(a)	100.560	%sq.m	1514.00	1522.48

SL No.	Description of Works	Quantity	Unit	Rate (Rs.)	Amount (Rs.)
21	Priming one coat on timber, plastered or on steel or other metal surface with synthetic enamel/oil bound primer of approved quality including smoothening surfaces by sand papering etc. 1) On timber surface SOR, PWD, P - 162, I - 7(a) 2) On Steel Surface SOR, PWD, P - 162, I - 7(b)	21.690 2.700	sq.m. sq.m.	41.00 31.00	889.29 83.70
22	Painting with best quality synthetic enamel paint of approved make and brand including smoothening surface by sand papering etc. including using of approved putty etc. on the surface, if necessary : With super gloss (hi-gloss)-With any shade except white a) On timber or plastered surface Two Coats b) On Steel surface Two Coats SOR, PWD, P - 162, - 8A(aii),(bii)	21.690 2.700	sq.m. sq.m.	89.00 86.00	1930.41 232.20
23	Iron hasp bolt of approved quality fitted and fixed complete (oxidised) with 16 mm diad with center bolt and round fitting. 300 mm long SOR, PWD, P-93, I - 27c	2.000	each	193.00	386.00
24	Precast piered concrete jally work as per design and manufacture's specification including moulding etc. with stone chips and necessary reinforcement shuttering complete including fitting, fixing in position in all floors. (a) 37.5 mm th. panels Cement & steel required for this item will not be issued by deptt. SOR, PWD, P-32, I - 38 (b)	1.690	sq.m.	351.00	593.19
25	Supplying, fitting and fixing UPVC down pipes A type and fittings conforming to IS 13592-1992 with necessary clamps nails including making holes in walls, etc. and cutting trenches in any soil, through masonry concrete structure etc. if necessary and mending good damages including jointing with jointing materials (Spun yarn, valamoid / bitumen / M. seal etc.) complete. P-173, I-21 A (ii), C(ii), D(ii) SOR, PWD, P173, I - 21 A (ii), C(ii), D(ii) i) UPVC Pipe 110 mm dia ii) UPVC Bend 87.5 degree 110 mm dia iii) UPVC Shoe 110 mm	3.000 2.000 1.000	Mtr. each each	291.00 162.00 128.00	873.00 324.00 128.00
26	M.S.or W.I. Ornamental grill of approved design joints continuously welded with M.S, W.I. Flats and bars of windows, railing etc. fitted and fixed with necessary screws and lugs in ground floor. Grill weighing 10 kg/sq m to 16 kg/m2 SOR, PWD, P - 76, I - 10 (i) (2.70sqm @ 10.5kg per sqm = 28.35 kg)	0.284	Qntl	8247.00	2342.15
27	Shallow water closet Indian pattern(I.P.W.C.) of approved make in white vitreous chinaware supplied ,fitted and fixed in position (excluding cost of concrete for fixing). 450 mm long SOR, PWD, (Sanitary) P - 65, I - 1 (iii)	1.000	each	1062.00	1062.00
28	Foot rest for water closet of size 275 mm X 125 mm with Artificial stone(4:2:1) with 6 mm stone chips and chequered including adding colour as necessary. SOR, PWD, (Sanitary) P - 66, I - 9	1.000	Pair	70.00	70.00
29	Supplying,fitting and fixing cast iron 'P' or 'S' trap conforming to I.S. 3989 / 1970 and 1729 / 1964 including lead caulked joints and painting two coats to the exposed surface. S Trap 100 mm SOR, PWD, (Sanitary) P - 54, I - 14(B-iii)	1.000	each	923.00	923.00
30	Supplying, fitting fixing CI Round Gratings 150mm dia SOR, PWD, (Sanitary) P - 55, I - 18(ii)	1.000	Each	100.00	100.00

SL No.	Description of Works	Quantity	Unit	Rate (Rs.)	Amount (Rs.)
31	Construction of 2 circular leach pit of inside diameter 1000 mm. & a depth of 1000 mm. With a layer of 250 mm. Thick brick work with cement mortar (6:1) & honeycombed brick wall (4:1) at every alternate layer upto a height of 925 mm. From bottom and then 125 mm. thick brick wall (4:1) for a height of 300 mm. and covered with 75mm. RCC slab (4:2:1) with 8mm tor steel @ 150 mm. centre to centre both ways including plastering and neat cement punning on top of the slab and making hooking arrangment on slab for lifting of the slab if require as well as jointing the connection with the inspection pit (450 x 450) covered with 50mm thick RCC slab (4:2:1) with stone chips and necessary reinforcement and connected with 100 mm dia PVC pipe laid over rammed earth and then covered the pipe properly with powder earth including supplying fitting fixing fibre glass pan P-tap & polythene pipe as per requirement to connect with the inspection pit complete with all respect as per direction of EIC. (ANNEXURE-II)	1	Item	7544.00	7544.00
	TOTAL AMOUNT		Rs.		350000.36
	Say		Rs.		350000.00
	Add for Electrical Works (ANNEXURE-I)		Rs.		17858.00
	TOTAL AMOUNT		Rs.		367858.00
			Say		368000.00
(Rupees Three lakh Sixty seven thousand Eight hundred & Fifty eight only)
