PREFACE

Pradhan Mantri Awas Yojana (PMAY) aims at Providing Housing for All (HFA) by 2022 when the Nation Complete 75 years of its independence.

The urban homeless persons contribute to the economy of the cities and thus the Nation as cheap labour in the informal sector; yet they live with no shelter or social security. The urban homeless service with many challenges like no access to elementary Public Services such as health, education, food, water and sanitation. Pradhan Mantri Awas Yojana (PMAY) also aims at providing a pucca house to every family with water connection, toilet facilities, 24 X 7 electricity supply and access.

The Mission seeks to address the housing requirement of urban poor including slum dwellers through "In Situ" Slum Redevelopment, Affordable Housing through credit linked subsidy, and Affordable Housing in partnership and subsidy for beneficiary led individual house. Under the mission, beneficiaries can take advantage under one component only.

We are hopeful that this ULB will be able to utilize the success of this Program for further Municipal developmental works & for upgrading the quality of civic life. It will facilitate this ULB to be self-reliant so that this town can be a potential generator of economic momentum in the desired direction.

The town has 179 Nos. Slum Pockets and 494 Nos. Non Slum Dwellers. DPR has been prepared on 162 Nos. Slum Pockets and 98 Nos. Non Slum Dwellers to minimize the deficiencies in civic amenities after carrying out necessary field survey work, the Slums.

This project report has been prepared for total outlay of Rs. 4857.60 lakhs and the physical schemes for this town have been identified on the basis of preliminary assessment befitting with the final and comprehensive development project plan for the entire town.

Chairman,

INTRODUCTORY NOTE OF THE CHAIRMAN, CONTAI MUNICIPALITY

Having a roof over head is not only a dream for individuals but providing the same admittedly falls under the basic priority for the Union & State Govt. as well as the Local Bodies particularly Urban Local Bodies to do away with the slums for a better life and living of people. Contai Municipality, established in 1958, grew in a non-planned manner since the pre Independence period. From the coastal agricultural villages people in large number slowly streamed into the Sub Divisional HQ town for various jobs or business or education of children since the pre-historic 1863 when the Sub Division was shifted from Negua to Contai. The major areas of Contai was sand dunes and therefore helpful for construction of kutch dwelling houses and emergence of stray slums of poor fishermen and domestic helps. With flourishing of schools, colleges, dispensaries & hospitals, markets sparse hutments grew along the Contai Coast Canal or sand dunes. Population grew in geometrical progression and unhealthy habitation is the obvious outcome.

Under the scheme titled **Housing for All by 2022** introduced by the Union Ministry of Housing and Urban Poverty Alleviation under the close supervision of the M&UA Department (SUDA) Govt. of West Bengal a thorough door to door survey of this **Cyclone Prone Coastal ULB** was conducted and demand for 7002 housing units for low income group, economically weaker section of society, basically the urban poor was placed for covering within the 7 years plan target. Already 1200 housing units were sanctioned against our AIP-2015-16 and 900 housing units sanctioned for the year 2017-18. We have already satisfactorily completed the beneficiary led construction 1200 units providing all possible amenities and the beneficiaries are in occupation of those units and 900 units in BLC mode in the year 2017-18 is going on. Out of targeted 5961 housing units on Beneficiary Led Construction Units by 2022. The proposals for 1000 BLC units meant for marginal category and economically backward people were submitted in the Annual Implementation Plan 2018-19 for favor of sanction but as per guide line of SUDA we take up 1000 units in the first phase confidently hoping to get the rest 500 units to meet the target of 1500 as early as possible.

The extant Annual Implementation Plan for Housing for All targets mainly the underprivileged. The comprehensive DPR, Action Plan together with all relevant details of amenity provision for 100 units are submitted for perusal and sanction in the first phase of AIP 2018-19 keenly hoping the rest 500 BLC units soon to make this growing Urban Local Body in the coastal belt of the Bay of Bengal an ideal place to live in.

CITY PROFILE

A. PRESENT CONDITION

1.	Climatic phenomenon	
	a. Rainfall b. Temperature c. Humidity	1622 mm(av) Min. 9°C Avg. 33°C 72% avg.
2.	Water Bodies & Aquatic animal and Flora & Fauna	There is no major water body along the project site.
3.	Passage of storm water	The roads are internal roads of the slums. The road alignment passes across the natural path of surface runoff.
4.	Topography	Mild slope towards South
5.	Human Settlement	On the roads & alignment kutchra drains already exists and no acquisition of land or property is required. Question of eviction of human settlement does not arise.
6.	Animal Kingdom	The development project does not affect any forest.
7.	Green belt	The project does not effect on the green belt,
8.	Obstruction / Barrier to existing facilities	No such obstruction will be created to the existing infrastructure facilities due to this development programme.

B. IMPACT & REMEDIES

1.	Utilization of alternative material Characteristics and availability of alternative material	Locally available earth, stone metal and bricks etc. will be used.
2.	Rehabilitation of water bodies & measures for maintaining surface runoff smoothly	No water body is affected by the alignment of road. The roadside open C. C. / Brick masonry drains have been provided for free flow of storm water.
3.	Measures for Erosion Control	Not applicable for the slum area.
4.	Conservation of Topsoil a. Extent of loss of topsoil b. Area requirement for topsoil conservation c. Inclusion of conservation of topsoil	Not applicable for the slum area.
5.	Impact on Heritage & Culture a. Identification of locally significant cultural properties b. Assessment of likely impacts	Question does not arise

	on each cultural property due to project implementation c. Possible measures for avoidance i) Identification of alternative routes ii) Relocation of Culture property in consultation with the local community iii) Common Property	
6.	Location of Natural Habitants	It will not be disturbed
7.	Construction of site office / Camp	Temporary construction of camp / office shall be established by contractor and since the project is small and scattered, the temporary impact on environment for Construction Camp / office at the time of execution of work is negligible.
8.	Quarrying of Materials a. Sourcing of materials from quarries b. Lead from various existing quarries c. Adequacy of material for the project in these quarries	The construction materials required for the project shall be procured from: a. Stone metal: from the existing quarry at Pakur at a distance of about 295 km. from the project site. b. Bricks: From the existing brick fields at Contaisourrundings at a distance of about 20 km. from the project site. c. Sand: From at a distance of about 80 km. from the project site. All the materials are sufficiently available.
9.	Water Requirement; Identification of potential sources of water	Water required for the construction of work will be available from natural pond and ground water. There is no scarcity of water in the region.
10.	Location of Waste Water Disposal : a. Location for disposal of waste water b. Outfalls locations for longitudinal drains c. Outfall level and back flow d. The outfall is in natural stream; measures shall be taken to prevent sediment into the stream.	The surface drains have been proposed in the slum for disposal of wastewater. Natural slope of the ground will be maintained for waterways for discharge of surface runoff. No possibility of back flow except in the case of heavy flood. The storm water drain of the slums will discharge the water to the main high drain of the town leading to the outfall which is at a distance about 1 km. from the point through a sump at outfall point.
11.	Air Pollution during construction work	Work shall be carried out by equipment's like concrete mixer machine vibrator etc. at this time of concerting work only for which air pollution will be negligible.
12.	Identify locations susceptible to induced development	Locations vulnerable to induced development: In such location the Municipality has committed not to allow building construction activity.

		a. Lands within 50 m of junctions b. Agricultural lands within 100 m of settlements c. Stretches within 100 m of worship places, weekly fairs and locations of community mass gatherings.

Physical Infrastructure profile

Water Supply

Water supply - This municipality has maintained major drinking water supply system through 9 nos of pump house, 3 nos of CWR and 3 nos of OHR from underground water sources by its water supply network. Though the water supply network extends over most of the core city and peripheral areas, it does not meet consumer demand as only 35% of the households within municipal limits are covered with piped water supply system. Apart from the surface water, ground water also serves as another source of water supply in the municipality as around 25% percent is served with hand pumps and 40% depend

on own tube wells and other sources. The features of water supply in CONTAI are presented in the table *below*.

Features for Water supply in CONTAI as on 2015

Source	Quantity and type
Ground water	1.35 MLD
No. of OHTs	3 Nos.
Distribution Line	47645 m
No. of stand posts	Nil
No. of Hand pumps	750
Total no. of service connections	2857
Domestic connections	2857
Non-domestic	5

Drainage and Sanitation

The total drainage network of Contai municipality is of 78 Kms. The storm water drains carry sullage and rainwater and ultimately drains into two main drainage channels, namely, i) Orissa Cost Cannel located on the middle part (North-South) of the municipality and ii) Cotai Nikasi khal located on Northern part (East-West) of this municipality

Solid Waste Management

Solid Waste Management in CONTAI Municipality is not as per MSW (Management and handling) rules 2000. Garbage is being collected from door to door by tricycle van from all wards and stored temporarily in the nearby vat points (primary collection Centre) managed by Municipality. There is also lack of on time collection and disposal to the existing dumping ground at ward no.20, which causes dumping in drains and spread of foul odour in the primary disposal point.

Road Coverage and Condition

Road network in CONTAI has grown to a total of 125 km. While more than 60% of roads are black topped and concrete, around 20% of the road network is still katcha road and 20% is brick Roads. Most of the existing arterial roads are narrow with two lane carriageways and needs to be widened to cater for the increasing vehicular traffic. Due to lack of proper maintenance, the surface conditions of the roads are not good which in turn reduces the speed of moving traffic.

The projected slums and existing scenario of infrastructure:

162 nos Slums and 98 Non Slum families have been selected as a First Project under PMAY scheme by CONTAI Municipality in consultation with the state level Nodal Agency-The State Urban Development Agency (SUDA) under M.A. Department, GoWB.

1. Dallu Para, Daptari Para (s.c.-001); Karati Para (Uttar) (s.c.-002); Karati Para (South) (s.c.-003); Jumma Masiid Para (s.c.-005); Goap Garh (North) (s.c.-006); Goap Garh (South) (s.c.-007); Saha Para (s.c.-008); Sek Para (s.c.-009); Khan Para (s.c.-010); Mahammad Para (s.c.-011); Kalia Para (s.c.-012); Jana Para (West) (s.c.-014); Jana Para (East) (s.c.-013); Nanda Para (s.c.-015); Barik Para (s.c.-016); Pal Para (s.c.-017);

The project above 17 nos of slums site are at the core area of the Municipality at Ward no-1. It is situated at East Part of the Municipality. Metal road is running in to the middle of the slums connects to major areas of CONTAI Municipality. The nearest sub divisional hospital station at a distance is 1.00 Km. The slums are average 25 years old with a total site

area are 0.227 square km. The ownership of land lies with ULB. The existing number of households 556 with a total population of 3892 nos. Most of the slum dwellers work as casual labour, rickshaw pullers in this localities, others engaged in local housekeeping, as sweepers in local areas, as cleaners at Municipal area and as vegetable sellers in nearby areas.

The environmental condition in the slum is little bit poor. The slum is partially covered with surface drains but drains are tilted. Most of the roads within slums are semi metallic kucha road. National Poverty Alleviation Programmes and PMAY

Slum: the focus Area

Under section-3 of the Slum Area Improvement and Clearance Act, 1956, slums have been defined as mainly those residential areas where dwellings are in any respect unfit for human habitation by reasons of dilapidation, overcrowding, faulty arrangements and designs of such buildings, narrowness and faulty arrangement of streets, lack of ventilation, light or sanitation facilities or any combination of these factors which are detrimental to safety, health and morals. Thus, conceptually slums are compact overcrowded residential areas (and not isolated or scattered dwellings) unfit for habitation due to lack of one or more of the basic infrastructure like drinking water, sanitation, electricity, sewerage, street etc. It is in this background that in the 2001 Census, an innovative attempt was made to collect demographic data as slum areas across the country. As per 2001 population census, the slum population is estimated to be 61.8 million, out of a total urban population of 285.35 million people reside in urban areas. The analysis of the data in this report provided an overview of the population characteristics of slums and squatter settlements and is expected to serve as a benchmark for pragmatic and realistic town planning while dealing with the issue of slums and slum dwellers.

- v. **ValmikiAmbedkarAwasYojana(VAMBAY):** VAMBAY is a central Government scheme to provide housing to the poor. Under VAMBAY scheme, an amount of Rs. 50,000 is extended to a beneficiary in a city with more than 10 lacs population while in the cities having population less than 10 lacs. Each beneficiary gets Rs. 40,000/- fifty percent of the amount is central government grant while the rest could be taken as a loan from HUDCO/ other nationalized banks/state government/urban local bodies.
- vi. **Integrated housing and slum development program (IHSDP):** IHSDP was under Jawaharlal Nehru Urban Renewal Mission (JNNURM) beginning from the year 2006-2008.

The major objectives for the IHSDP program are:-

- ☐ Focussed attention to integrated development of basic services to the poor. The basic services include security of tenure at affordable price, improving housing, water supply and sanitation.
- ☐ Secure and effective linkages between asset creation and asset management so that the basic services to the urban poor created in the cities, are not only maintained efficiently but also become self-sustaining over time.

HFAPoA and Pradhan Mantri Awas Yojana (Housing for All)

To give pucca house for every family is currently on the global agenda. One of the Millennium Development Goals (MDGs) is to achieve significant improvement in the lives of slum dwellers, by 2022. Similar goals are set forth by Pradhan Mantri Awas Yojana within year 2022, to create pucca house for every family.

ULB undertake a demand survey through suitable means for assessing the actual demand of housing. While validating demand survey, Cities consider possible temporary migration from rural areas to the city just to take advantage of housing scheme and exclude such migrants from list of beneficiaries. On the basis of demand survey and other available data, cities prepare Housing for All Plan of Action (HFAPoA). HFAPoA contain the demand of housing by eligible beneficiaries in the city along with the interventions selected out of four verticals. The information regarding beneficiaries is collected by ULB in suitable. While preparing HFAPoA, ULB and Implementing Agencies also consider the affordable housing stock already available in the city as Census data suggests that large number of houses are vacant.

Bank account number and Aadhaar number/Voter ID card/any other unique identification details of intended beneficiaries or a certificate of house ownership from Revenue Authority of beneficiary's native district integrate in the data base of HFAPoA for avoiding duplication of benefit to one individual family. Beneficiaries is validated by ULBs thereby ensuring their eligibility at the time of preparation of the projects and approval of projects.

On the basis of HFAPoA, States/Cities subsequently prepare the Annual Implementation Plans (AIPs) dividing the task upto 2022 in view of the availability of resources and priority. For larger cities, HFAPoA and AIPs is prepared at sub-city (ward/zone etc.) level with the approval of concerned State/UT Government. The result of demand survey, draft HFAPoA and draft AIP is discussed with the local representatives including MLAs and MPs of that area so that their views are adequately factored in while finalising the plans and beneficiary list.

Cities which have already prepared Slum Free City Plan of Action (SFCPoA) or any other housing plan with data on housing, utilise the existing plan and data for preparing "Housing for All Plan of Action" (HFAPoA). Houses constructed under various schemes should be accounted for while preparing HFAPoA

UrbanPopulationLivinginSlumsandtheIndianScenario(source:UN-HABITAT)

The preparation of HFAPs broadly involve Slum Development/Rehabilitation Plans based on

- a. Survey of all slums— notified and non-notified;
 - b. Mapping of slums using the state-of-art technology;
 - c. Integration of geo-spatial and socio-economic data; and
 - d. Identification of development model proposed for each slum.
-
1. Base map to an appropriate scale would be a pre-requisite for the preparation of Slum Development Plan/Slum-free City Plan. States/UTs may need to proceed in the following steps for the preparation of Slum-free City Plans.
 2. Securing CARTOSAT II/latest satellite images from NRSC/ISRO and preparation of base maps for the whole city and its fringes using the images;
 3. Identification and inventory of all slum clusters of all descriptions in the urban agglomeration with the help of satellite image and other available data;
 4. Inventory of all possible vacant lands in each zone of the urban agglomeration that could be used for slum development/rehabilitation development purposes;
 5. Development of Slum Map of every slum within the city and its fringes using GIS with CARTOSAT II images, ground level spatial data collected through total station survey, collating spatial information with respect to plot boundaries, network of basic infrastructure like roads, sewerage, storm drainage and water lines, etc and superimposing this on the satellite image and importing them into GIS platform as the first step towards the preparation of Slum Development Plans and Slum Free City Plan.
 6. This may be undertaken with the help of technical partners of NRSC/ISRO/other technical institutions.
 7. Identification and engagement of Lead NGO/CBO to guide and anchor community mobilization for the purpose of slums survey, (May be more than one NGO/CBO in different slum zones) of the city. These Lead NGOs/CBOs should also be associated in slums survey operations and dialogues for preparation of slum level development plans;
 8. Conduct of Slum Survey based on the detailed formats (with or without changes) prepared by the Ministry of Housing & Urban Poverty Alleviation with the help of National Buildings Organization (NBO)-after due training of trainers, training of survey personnel/canvassers and canvassing. It would be helpful for community mobilization to pick as many canvassers from the sourced slum or near by slum pockets;

9. Collection of bio-metric identification data of slum dwellers based on the above survey (subject to guidelines issued by Unique Identity Authority of India (UIDAI));
10. Entry of data from Slum Surveys in the web-enabled MIS Application (to be provided by Ministry of HUPA), compilation and collation of data, preparation of Slum-wise, City and State Slum Survey Database and Baseline Reports. The MIS will assist in developing a robust Slum and Slum Households Information System. (Guidelines and software for development of the MIS will be issued by the Ministry of HUPA);
11. Integration of Slum MIS with GIS Map to enable the preparation of GIS-enabled Slum Information System that is to be used for the preparation of meaningful Slum Development Plans and Slum-free City Plan using a city-wide/zone-based approach. (Guidelines and software for development of GIS platform and its integration with the MIS will be issued by the Ministry of HUPA);

Introduction to Pradhan Mantri Awas Yojana (PMAY)

Pradhan

Mantri Awas Yojana (PMAY), a path-breaking scheme for the slum dwellers and urban poor envisages a 'Pucca house to every family' through encouraging States to tackle the problem of slums in a holistic manner. It calls for a multi-pronged approach focusing on:

- ☐ Bringing existing slums within the formal system and enabling them to avail of the same level of basic amenities as the rest of the town.
- ☐ Redressing the failures of the formal system that lie behind the creation of slums.
- ☐ Tackling the shortages of urban land and housing that keep shelter out of reach of the urban poor and force them to resort to extra-legal solutions in a bid to retain their sources of livelihood and employment.
- ☐ Enactment of a set of reforms at the state and city level related to inclusive planning, regulation and financing, which would ensure that adequate fresh housing stock and services get created on an ongoing basis to address both current and future needs of cities.
- ☐ An integrated approach covering shelter, services and livelihoods for poor slum communities.

The duration of Pradhan Mantri Awas Yojana [PMAY] **2015 TO 2022**

Eligible Components of the PMAY:

Allotment of Houses

Allotment of dwelling units will be in the name of the female member of the . Alternatively, it can be allotted in the name of husband and wife jointly. Ownership of land required for every Beneficiary.

A EWS beneficiary family will comprise husband, wife and unmarried children.

The beneficiary family should not own a pucca house (an all weather dwelling unit) either in his/her name or in the name of any member of his/her family in any part of India to be eligible to receive central assistance under the mission.

EWS households are defined as households having an annual income up to Rs.3,00,000 (Rupees Three Lakhs). States/UTs shall have the flexibility to redefine the annual income criteria as per local conditions in consultation with the Centre.

Following infrastructure will be considered for support under PMAY:

1. Water connection
2. Toilet facilities
3. 24 x 7 Electric facilities
4. Roads

Need for Projects

This development project models will give benefits in the city. One of the key objectives of developing the Projects is to incentivize innovation and encourage new approaches and solutions that can demonstrably improve the quality and quantity of shelter and services for the poor.

Such innovation could encompass:

- ☐ Projects with strong community participation i.e. Slum upgradation/ redevelopment projects initiated/spearheaded by the community; or with their

demonstrable involvement and participation in design, planning and implementation

- ☐ New models of public-private partnerships whereby the private sector can be encouraged to take up affordable housing for the EWS/LIG.
- ☐ Innovations in planning, demonstrating integrated livelihoods, shelter and services; or convergence.
- ☐ Innovative or cost effective and green building design and technologies.
- ☐ Financial innovations in delivering the city/state wide programme.

Aims and Objectives

Vision

The mission seeks to address the housing requirement of urban poor including slum dwellers through following programme verticals:

- Slum rehabilitation of Slum Dwellers with participation of private developers using land as a resource
- Promotion of Affordable Housing for weaker section through credit linked subsidy
- Affordable Housing in Partnership with Public & Private sectors
- Subsidy for beneficiary-led individual house construction

Objectives

The project has been designed keeping in mind the following objectives.

- ▶ Integrated development of all existing slums, notified or non-notified, i.e., development of infrastructure and housing in the slums/rehabilitation colonies for the slum dwellers/urban poor, including rental housing.
- ▶ Development/improvement/maintenance of basic services to the urban poor, including water supply, sewerage, drainage, solid waste management, approach and internal road, street lighting.
- ▶ The Creation of affordable housing stock, including rental housing with the provision of

civic infrastructure and services, on ownership.

- Encouraging Public Private Partnership by having pay and use toilets and educate the slum dwellers for keeping the environment clean and hygienic

The Nodal Department for West Bengal is Municipal Affairs Dept. (M.A. Department), Government of West Bengal. The state level Nodal Agency is State Urban Development Agency (SUDA) under M.A. Department. State Urban Development Agency was set up in 1991 with a view to ensuring proper implementation and monitoring of the centrally assisted programmes for generating employment opportunities and alleviation of poverty throughout the State. SUDA is a Society registered under the West Bengal Societies Registration Act, 1961.

Funding Pattern of PMAY

Funding pattern for PMAY (Housing for all)

- ☆ Central share 1.5 LAKHS of total cost of dwelling unit
- ☆ Beneficiary share 0.25 LAKHS of total cost of dwelling unit
- ☆ State share rest of total cost of dwelling unit
- ☆ State + ULB bear the cost of infrastructure
- ☆ State share for infrastructure to be minimum 5%
- ☆ ULB share for infrastructure to be minimum 5%
- ☆ Cost of infrastructure 10% of sum total cost of dwelling unit

Approvals & Release of Funds

- ✦ Releases and approvals to be on the basis of DPRs which need to be submitted with approval of State Level Sanctioning and Monitoring Committee
- ✦ Innovative projects to be considered for sanction even in the preparatory stage.
- ✦ Central Funds to be released in three installments to the State Governments/SLNA; central assistance under different components will be released to the state / units after the approval of CSMC and with concurrence of the integrated Financial Division of the Ministry. Central share would be released in three installments of 40%, 40% and 20% each.

Project Cost and Financing Strategy

For Dwelling Unit

Total no of Dwelling unit = 900 Nos

Rate per Dwelling unit = 3.68 Lakhs

Total Cost of Dwelling unit = $900 \times 3.68 = 3312$ Lakhs

Central Share = 900×1.5 Lakhs = 3350 Lakhs

State Share = 900×1.93 Lakhs = 1737 Lakhs

Beneficiary Share = 900×0.25 Lakhs = 225 Lakhs

ULB Share = NIL

For Infrastructure

10 % of total Dwelling unit cost = $3312 \text{ Lakhs} \times 10\% = 331.20$ Lakhs

Central Share = NIL

State Share = $50\% \times 331.20$ Lakhs = 165.60 Lakhs

Beneficiary Share = NIL

ULB Share = $50\% \times 331.20$ Lakhs = 165.60 Lakhs

The total project cost will be 3643.20 Lakhs

Out of these 3643.20 Lakhs is the cost of Housing Infrastructure. The following table shows the share of cost between housing infrastructure & Physical Infrastructure.

Table: Cost Break up between Housing & Infrastructure

S.No.	Component	Cost on Lakhs
1.	Housing Cost(2017 - 18) Dwelling Units)	3312.00
2.	Infrastructure Cost	331.20
	Total	3643.20

Definition of Slum for Housing

Different definitions of a slum exist in different statutes and in urban poverty literature. For the purpose of HOUSING SCHEME, it is proposed to adopt the definition given in the 2001 Census, which is as follows:

- a. All areas notified as 'Slum' by State/Local Government and UT Administration under any Act;
- b. All areas recognized as 'Slum' by State/Local Government and UT Administration, which have not been formally notified as slum under any Act;

'Slum' or 'Slum Area'—is a compact settlement of at least 20 households (For NE & Special Category States it is 10-15 households) with a collection of poorly built tenements, mostly of temporary nature, crowded together usually within inadequate sanitary and drinking water facilities in unhygienic conditions.

Situation Appraisal

The people living in the slums mostly have kutcha (10) and semi-pucca (186) housing. In certain cases where pucca housing is available, they are usually in dilapidated condition. The kutcha houses are in very poor condition and require extensive repairs. Most of the houses have tiles on roof. While during the surveys some of the houses have been noted to be in average condition, the quality of these houses is also speedily deteriorating.

Proposed Intervention

[MED, GoWBPMAY (Housing for All): CONTAI Municipality]

In line with the vision to 'housing for all', an integrated housing programme implemented. The target will be all the slum / Non Slum dwellers in the pocket.

is proposed to be

Building Plan

The buildings are proposed to cover an area of approximate 32 Sq. mt along with provision of 2 rooms, kitchen and sanitation facility. The layout, size and type design of housing dwelling units depend on the local conditions and the preferences of the beneficiary. The houses, has been designed in accordance with the desire of the beneficiaries, keeping in view the climatic conditions and the need to provide ample space, kitchen, ventilation, sanitary facilities, etc. and the community perceptions, preferences and cultural attitudes.

In line with the scheme, carpet area of the house will be not less than 25 sq. mts and preferably two room accommodation plus kitchen and toilet should be constructed.

Compliance with Municipal Byelaws

All designs & drawings are created keeping in line with the municipal byelaws.

Building material

- ☆ PCC (1:3:6) for foundation
- ☆ RCC M-20 for substructure & superstructure (Column, Beam, Slab)
- ☆ HYSD Steel
- ☆ 1st class Brick Masonry
- ☆ 1:6 (Cement: Sand) plaster – 10 mm on soffit of beam & slab, 15 mm on internal walls & 20 mm on external walls
- ☆ IPS flooring

Structural Design

- ⇒ Following are the general considerations in the analysis/design.
- ⇒ For all structural elements, M20 grade concrete and Fe415 grade of steel is used.
- ⇒ Plinth beams passing through columns are provided as tie beams.
- ⇒ Pedestals are proposed up to ground level.
- ⇒ Beam Centre-line dimensions are followed for analysis and design.
- ⇒ For all the building, walls of 250 mm and 125 mm thick with 20 mm External plaster and 12 mm thick internal plaster are considered.
- ⇒ Seismic loads are considered acting in the horizontal direction along either of the two principal directions.

Design data

- Live load: 2.0 kN/m² at typical floor
- 1.5 kN/m² on terrace (With Access); 0.75 kN/m² on terrace (without Access)
- Floor finish 50 mm (0.05*24) = 1.2 kN/m²
- Ceiling plaster 12 mm (0.012*20.8): 0.25 kN/m²
- Partition walls (Wherever Necessary): 1.0 kN/m²
- Terrace finish: 1.5 kN/m²
- Earthquake load: As per IS-1893 (Part 1) - 2002
- Depth of foundation below ground: 0.7 m
- Walls: 250 mm thick brick masonry walls at external and 125 mm walls internal.

Status of existing infrastructure & services

Municipality, with its selected local body in place, has developed its situational strength to implement, operate & maintain proposed infrastructure. The Municipality spreading over an area of 14.25 square kilometers is comprised of 21 wards. With efficient and trained power, the Municipal has developed both technical and administrative skills. The development of appropriate municipal organizational structures with qualified staff is essential if municipalities are to provide cost-effective services to citizens. With local government reform, municipalities are required to take on new tasks, and provide new services. This will only be possible if municipalities have cost-effective and appropriate structures and staff that are well qualified and highly motivated. The municipalities should plan in such a way so as to ensure that they can meet the needs of citizens effectively and efficiently.

Status of Slums under Municipality

[MED, GoWBPMAY (Housing for All): CONTAI Municipality]

1. As per the available data, the total number of people living in slums amounts to 36636 covering an area of 2.272 sq.km. Thus over the 40% of Municipality's population resides in slums, squatters and other poor settlements. Their contribution to city's economy has been also been growing over the period.
2. In the absence of a focused program and in a background of ever-increasing urbanisation, the slum dwellers continue to be deprived of access to basic services, socio- economic needs. The problems are multiplied by increasing migration. It is necessary, therefore, to develop clear-cut strategies, Programmes and action plans to provide the basic Services to the Urban Poor.
3. Municipality is basically a town and has been having substantial industrial and economic growth over the years. This has resulted in substantial growth in population triggered of by substantial migration. Continued influxes of migrants have resulted in mushrooming of slums and squatter settlements. Quality of life has thus suffered and the gaps between the demand and supply of essential services and other infrastructures have widened many fold.
4. Slum settlements have multiplied over decades and the living conditions of the poor have not improved. Environmental decline, vehicular pollution, inadequate basic services and infrastructure in the poor settlements hit the poor hardest. Slums are scattered across the city occupying both private land and lands belonging to various public entities. However, they were neither adequate nor did they have proper ventilation or hygiene.
5. Lack of sufficient ventilation in the rooms, low and damp floor levels, congestion, want of proper drainage, and general unhygienic conditions from the characteristics common feature of these bustees. Privy accommodation in many cases is far too inadequate considering the number of the inmates. Through the service privies have been converted, but the numbers are not increased. In fact the slums found in CONTAI Municipal area.
6. Firstly slums that grew up in the own lands of the dwellers but have no civic amenities, which are basically found in the listed 34 slums.

Slum Infrastructure Improvement Plan

The development objectives are:

- Ensure basic infrastructure services to all slums to provide better quality of life by giving emphasis on water supply and sanitation.
- Ensure maintenance of the asset created locally by ensuring collection of user charges locally and to enhance community participation.
- Ensure regular water supply and safe drinking water.
- To improve drainage system removing water logging in the slum.
- To ensure timely disposal of garbage of the slum.
- To provide housing for the dwellers of the slum.
- To provide street light facilities in the slum area.
- To provide road, community bathroom, community toilet and community sevakendra.
- To ensure economic upliftment

Key Findings–Slums under Municipality:

Water Supply:

The main source of water supply in Municipality Municipal area is Ground, which is used for different purposes including drinking purpose. Like other areas slum dwellers also use the groundwater through street tap, municipal pipeline.

Sanitation:

This is one of the most important services to be provided in the slum. Most of slum dwellers use ILCS latrine.

Drainage system:

In this slum there is insufficient drainage network. These areas are generally low and having water logging problems. Drainage network within the slum is to be designed. This system is to be connected to the main drain network of the ULB. Thus in most cases drainage system will not be effective without this development.

Most households, mainly in the added areas, have made kaccha outlets from their premises that permit wastewater to flow out into the street. All the kaccha and pucca drains are connected with approach drain. Most of the drains are refilled with waste material of the slum. As a result, the situation becomes even worse during the monsoons. Most of the drains are in overflow and water logged in slum areas.

Slums of Municipality have both type of drainage system i.e. kaccha and pucca.

Solid waste management:

There is door to door waste collection in this municipal area as well as slum areas. BWM held meeting for the campaigning of the system. Proposal for solid waste collection has taken in all over the municipal area as well as in the slums.

Slum Profile and its Location with It's Land Value.

Slum status as per Location

Location wise analysis shows that 95 slums are situated in core area¹ of the municipality, out of which 26 slums high value zone & Remaining 69 slums are situated in moderately high located within the 14 Nos (Ward No-7,8,9,10,11,12,13,14,15,16,17,18,19,21) & another medium value zone-Z3 & low value zone-Z4 slums are 12 & 72 respectively with in 6 no of wards (Ward No-1,2,3,4,5,6 & 20).

Status of Slums in Contai Municipality as Per Location:

Status of Slums	Core Area				Fringe Area				Slum Population in % terms of total population of slums	Slum HHs in % terms of total number of slum HHs
	No. of Slums	No. of HHs	No. of Persons	Area (Sq. Km)	No. of Slums	No. of HHs	No. of Persons	Area (Sq. Km)		
Non-Notified	95	2830	19443	1.182	84	2637	17193	1.09	39.73%	30.05%

Total area under slums is 2.28 sq. km which excluding² vacant land, water bodies falling under slums

- Total area under slums in Contai constitutes 16% of the total area.

Land Value Analysis

Owing to geographical nature of the municipality as mentioned in the above section, land values in slums are observed to be of varying nature. Based on information on land values at different areas of Contai received from West Bengal Valuation Board (WBVB), all the slums³ have been categorized into four zones in order of increasing market value. The zones are: i) Z1 (High), ii) Z2 (Moderately High), iii) Z3 (medium) and iv) Z4 (Low). (Refer annexure B-4 for land values in four zones)

Distribution of slums in the four zones has been presented in the figure and image below. It is observed from the image that

- Majority of slums located in the eastern & western zone of the Municipality have relatively lower land value zone (Z3 and Z4). This is primarily attributed to the rural characteristics of this part of the municipality with a significant presence of agriculture and plantation area.
- Owing to proximity to the centre of the Town along with presence of majority of the commercial establishments of the municipality is relatively more strategic in terms of land value.

Population Density:

Based on demographic analysis for 179 slums, it is found that 55 slums (29%) have low population density i.e. up to 10,000-15,000 persons per sq. km and 86 slums (51%) have medium density ranging between 15,000- 20,000 persons per sq. km, whereas 38 slums (20%) have high density ranging between 20,000& above persons per sq. km. Table below shows ward ward-wise distribution of slums with respect to population density per sq. km.
