Town features

HISTORY

Dankuni Municipality is established in 1st November, 2008 after converted by three gram panchayat Dankuni, Mrigala, Monoharpur, and part of Garalgaccha gram panchayet. Dankuni Municipality is situated within Dankuni police station under Sreerampur subdivision in the district of Hooghly. It was established in 2008 with a Government nominated Board. Initially Nineteen wards were carved out of Panchayet areas to make way for the Municipality. The 11 mauzas are included with it. At that time population of Dankuni Municipality stood at 2010 is 1,04,326. Currently this Municipality has an area of 19.5 sq. km. At the outset the Municipality ran its office from erstwhile Monaharpur Gram Panchayet at Monaharpur, Dankuni, Hooghly.

YEAR OF ESTABLISHMENT

Dankuni Municipality is established in 1st November, 2008.

ADMINISTRATIVE BOUNDARIES

The municipal town of Dankuni is located within the Sreerampur subdivision in the district of Hooghly, West Bengal. It is situated at a distance of approx. 14 km from Kolkata. The Municipality is surrounded by the Rishra and Naity Gram Panchayet in the North and Chakpara Anandanagar and Raghunathpur Gram Panchayet in the south, Barijhati, Garalgacha Gram Panchayet and Saraswati River in the West and Kanaipur Gram Panchayet in East. (Geographical coordinates: 22° 81' North, 88° 23' East).

LINKAGES OF RAIL, ROAD, PORT AND AIR

It is well-reachable by trains from both Howrah Station and Sealdah Station. Dankuni Junction rail station is 15 km from Howrah Station. The "Heart of Dankuni" is Dankuni Railway Station and Dankuni Housing. Dankuni is located on the Howrah-Bardhaman Chord line, which was constructed in 1917. The Calcutta Chord to Dankuni over the Willington Bridge (renamed Vivekananda Bridge) was opened in 1932. It is part of the Kolkata Suburban Railway system. Already, there is a growing presence of freight and wagon movements around Dankuni Railway Station, which is important as it connects

HFAPoA for Dankuni Municipality

Eastern Railway with South Eastern Railway with a link line. Dankuni has a fast growing freight yard, where goods traffic is moved, sorted, and packed to deliver at other destinations. In the future, Dankuni will play a significant role because it will be the endpoint of the Ludhiana-Dankuni leg of the Dedicated **Freight Corridor** that is being built by Indian Railways. Traffic, especially that of freight will continue to grow and will positively impact the railways.

Apart from this railway connection, this town also enjoys good linkage by road with other towns of the district. The hinterlands as well as other sub-division town are also well connected by the state highway and National Highway. Dankuni Municipality enjoys pretty good road network connectivity with the surrounding areas. Both NH -2 and NH- 6 terminate at Dankuni. The Palsit-Dankuni section of NH 2 is also referred to as **Durgapur Expressway**. Other major arteries meeting at Dankuni are **Beighoria Expressway** connecting to NH 34 and the **Dankuni-Memari Delhi Road**.

ECONOMIC ACTIVITY

Dankuni is an upcoming industry based town. It is a fast-growing industrial township near Kolkata, India. There are already numbers of big, medium and small industries functioning in the area. More are in the pipe line. Because of this employment potential, people from all over this state and other states of India have migrated for jobs here. Hence quite a high percentage of population depends on these industries and the rest cater to the needs of this bulging work force. As a result consumer trading is also the main stay of business in this area. In service sectors like. Major Industries like "Mother Dairy", "Coca Cola", "Dankuni Coal Complex Ltd", "Food Corporation of India" and many other have been established.

PLACES OF INTEREST

Chamundatala Mandir situated at Ward 11 and Furfura Sarif closed to municipal area, are the two important place of interest.

FESTIVALS

Like all other parts of West Bengal, Dankuni celebrates most of the common Pujas like Durga Puja, Kali Puja, Laxmi Puja but Monber Kali puja, Pardankuni Rakkha Kali puja, Chamunda Mata Puja is a special occasion when fairs are held. Baishakhi mela, Anondo Mela, Boimela, Rash mela, Milon mela are some other fairs.

TRADITIONAL ARTS/CRAFTS

Zardousi work is practiced in various wards of the municipal town.

CLIMATE

Dankuni has a tropical savanna climate. The annual mean temperature is 26.8°C, although monthly mean temperatures range from 16°C to 33°C and maximum temperatures in Hooghly often exceed 38°C. The main seasonal influence upon the climate is the monsoon. Maximum rainfall occurs during the monsoon in August and the average annual total is above 1,500 mm. Moderate north-westerly to north-easterly winds prevail for most of the year with a high frequency of calms. Summer is dominated by strong south-westerly monsoon winds. Winters are comfortable with temperatures ranging between 11°C to 17°C.

SOIL AND GROUND WATER SCENARIO

The ULB is a completely flat land with no of place having more than an elevation of 200 meters. The soil of Dankuni is alluvial and fertile. Availability of ground water is very easy, although in some areas it is contaminated with iron content which is rather high compared to other areas.

MUNICIPAL OFFICE

The Municipal office is situated at the erstwhile Monoharpur Gram Panchayat. The present municipality is governed by the Board of Councillors (BOC). The chairperson is administrative head of the municipality and is supported by Councillors, Standing Committees, Executive Officer and other employees to run the municipal functions smoothly.

Housing and Physical Infrastructure profile

Dankuni municipality is a newly formed municipality. The municipality has typical peri urban features with typical rural houses. Dankuni Municipality has 127 nos. slums with slum population of 44,696 nos. as identified in Socio-economic Survey (USHA) conducted by the Municipality. People living in

HFAPoA for Dankuni Municipality

these slums do not have access to basic amenities of life. It is because of non-development of basic infrastructure development has been the first priority in this Municipality.

It appears from the household survey slum dwellers own shacks, Kuchha and temporary house which are mostly in wretched and dilapidated state. After identification of such house, new housing accommodation has been proposed under BSUP and existing other government supported programmes.

Housing - It appears from the household survey slum dwellers own shacks, Kuchha and temporary house which are mostly in wretched and dilapidated state. After identification of such house, new housing accommodation has been proposed under BSUP and existing other government supported programmes. Under centrally sponsored BSUP programme a total of 127 slums has been identifies for housing and infrastructure improvements. A total of 1499 houses were sanctioned while only 1299 houses constructed till June 2015.

Water supply:

In the identified slums, almost only 35% population of the total population covered by piped water supply through stand posts and also uses water from public tube wells to meet their daily need of

Chairman
Dankuni Municipality

drinking water . Currently the slum pockets do not have the quantum of water essentially required for daily use. Moreover not all areas in the slum are covered by pipe lines and this being so, the extension of pipeline is required to cover the entire stand posts are required to set up in areas where the pipe line already exists.

Road:

In respect of road coverage in slums it is found that existing network of roads is inadequate for easy connectivity. The slums have 9.4 km of black top road having 3.0 metre wide crust. Brick paved road 7.2 km 2.4 meter wide and 12.1 km kuccha road in total, which constitute about 33%, 25% and 42% respectively.

Street Light & Electricity:

Transformer at ward 20

Major parts of slum areas lack electricity connection. In some ways the gap has been filled by illegal tapping of electricity. Regarding street illumination the street posts numbering only about 426 lamp posts erected which is inadequate to meet the needs of the slum dwellers.

Drains:

Mostly open surface type drainage that flows undergravity covering 9.6 km is in existence and the water flows off to Dankuni Khal. Such meagre coverage has led to water logging in different areas of slums and consequently areas required more drainage constructivity.

Solid Waste Management: The practice of primary collection system has not been introduced and the problem is being tackled by providing vats. This Municipality has decided to initiate house to house collection for the town under SWM programme. It is here that community participation is required. Logistics like bins, hand carts, tricycle vans to collect and cart out accumulated garbage are being procured.

Sanitation:

Modern sanitation facilities are singularly absent in the slums where maximum kaccha latrines are in use for defecation and other purposes. To make the matter worse, open defecation is also practised generating unhygienic conditions throughout the slums. Hence two pronged attack is to be made on this-while kaccha latrines are to be converted into **Low Cost Sanitary Latrine**, **Community Latrines** are to be constructed on basis of community participation along with bathroom facilities.

Community hall:

By nature, slums are noted for lack of social and cultural activities. Hence establishment of community hall may help fill this gap. There is no going slum development project at the municipality.

Urban houseless population:

A total of 16 houseless populations were identified during a survey conducted on June 2014. 1 person is neither interested to avail government run facility nor is living in any static location

Assessment of Present Status of Slums

It has been reported that out of total 129 slums, 87 are notified, 42 are not notified.

In terms of available socio economic and demographic profile and infrastructure facilities i.e. road, drain, drinking water supply, sanitation, solid waste management, drinking water facilities etc. the status is not good.
