1. City Profile and Overview

Gayeshpur Municipality town is a very small town which has declared as Municipality from Notified Area Authority , in the year 1995. Mostly the re fugees of East Pakistan has settled down in this area since independence and most of them receives Patta i.e, land right.

Since declaration of the notified area the authority has put tremendous efforts to create this place a healthy living place and put efforts to provide urban amenities to its citizens despite its fund crunch. Now this municipal town in terms of physical infrastructure.

Gayeshpur though is a very small town but has many historical places. It is said that His Lordship Chaitanya Mahaprobhu took refugee under the Banyan Tree of Dharamarajtala. Every year thousands of pilgrims from different parts of the State visit on the Krishns Ekadashi day of the month of Poush.

Thousands of minority population and common people participate in the Maniktala Mela every year on the day poush Sankranti.

A Pleasant picnic Garden with an area of 0.15 sq.km has been set up within Gayeshpur Municipal Area. Children and adults use this spot for picnic and recreation during winter season.

The Gayeshpur Municipal Area is bounded on West by Barrackpur-Kalyani Expressway, on North West by the railway track, on North by the Moragachha Road and on South West by Mathura Bill. Mathura Bill on the South Western boundary poses as a constraint and limit to physical growth while the boundaries on other three sides act as definite forces of accessibility of varying degrees. Gayeshpur Municipality covers an area 18.356 sq.km only.

Population and development are intrinsically interrelated and progress in any component can catalyze improvement in others. In recognition of this awareness the CDP seeks to integrate the population perspective with all development policies to be undertaken in the plan. The population statistics is provided below:

Table 1: Population of Gayeshpur

SL No.	Item	Gayeshpur
1	Total population (Census 2011)	58998
2	Decadal Growth (Census 2011) (%)	7.17
3	Density	3213

Source: Census of India, 2011

The population projection is important because the services and facilities provided by the municipality ought to increase at the same ratio as the population growth. The projected population in the next 5 to 10 year should have the infrastructure and the economic stability and social standing for a good and healthy life. Thus a systematic development of the basic infrastructure is the need of the day.

2. Housing and Physical Infrastructure profile

Housing profile

In context of Gayeshpur, 45% of households live in pucca or partially pucca houses¹. Housing condition in its slums is not in good shape as 80% houses are either Katcha or semi-pucca. Considering the above, municipality has already initiated construction of affordable houses in 40 slums spread over 17 wards on a piecemeal basis leveraging BSUP scheme in a phased manner. In the First phase (2008-2012) total 543 houses were constructed in 29 slums spread over 12 wards. Infrastructure projects like Road, Drain and pipeline work were also targeted in some of the slums. In the 2nd phase (2009-ongoing), 1102 dwelling units have been constructed till 2012 along with CC Road, Shallow drain and water supply distribution line. 3rd phase of BSUP is also under process.

The following table gives ward-wise construction of urban poor houses planned during 2007-08 till date under BSUP and HUP.

Gayeshpur Municipality needs to get the required quantity of water from Kalyani water supply project. AC Pipes constitute major portion of the water supply pipe net work. All these AC pipes must be replaced because these are not allowable in the water supply net work from the point of view of hygiene, leakage in supply and recurring cost of repair and maintenance. It can be concluded that the water supply system in Gayeshpur Municipal Area should be planned fresh to meet the existing lacunae, future demand and the objectives set by the municipality. The municipality is managing the water supply system in association with KMWSA & KMDA.

Drainage and Sanitation

The wastewater from house holds, public places, surface cleaning as also the storm water surface run off are disposed by only surface drains lay sporadically over the areas under habitation use. The natural drainage course viz. (1) Mathura Bill along the Eastern and Southern boundary of the municipal area runs to the River Hooghly and (2) Bager khal-Kulia Bill system inside the municipal area close to the North Western boundary runs to the River Hooghly. There is presently no sewerage network in Gayeshpur municipal area in the year 2013-14 and the work is in progress for setting up sewerage net work in all wards.

The municipality has no scientific method for measuring waste collected at present. Daily collection of solid waste is dumped in the homestead land and street and the municipality through its own mechanism collects the waste from road side. A land measuring around 4 Acre has been identified at Kanpur Mouza for scientific management of solid waste .While it has not yet finalized. S. No	Structure of the House	Number of Units
I.	Construction of Semi-Pucca House to Pucca Houses	2279
II.	Construction of Kuchha house to Pucca Houses	1100

Preventive approach takes into consideration both the existing housing shortage and housing units that may be required in the future.

The Housing for preventive approach is calculated by considering the following parameters in the figure below.

Figure: 7 :Housing Shortage preventive approach

The housing shortage in each of the above components is calculated as follows:

A. Assessment of Current Housing Shortage

I. Obsolescence Factor:

According to the "Report of the Technical Group on Estimation of Urban Housing Shortage", the households living in the dwelling units aged 65 years or more are deemed to be unfit for habitation". The obsolescence factor is taken into consideration as dilapidated houses in census records.

The following table shows the housing condition of residential houses in the Nadia District.

4. Intervention Plan an Central Assistance

In Intervention Plan, Baruipur Municipality takes only two verticals i.e. "Credit Linked Subsidy" and another vertical is "Beneficiary led construction". From present Demand Assessment survey for Housing for all (HFA), it is noticed that 3379 household covering under this project. Out of these 3379 houses, 3241 houses will be constructed through "Beneficiary-led-Construction" and 138 houses will be constructed through "Credit Linked Subsidy". Under "Beneficiary-led-Construction" each beneficiary will get 1.5 lakh from central assistance and under "Credit Linked Subsidy" each beneficiary will get Loan from Financial Institution.

Details of central assistance is given in the following tables:

1.2.1 Stakeholders Consultative Workshop / Meetings

PMAY envisages continuous involvement of all stakeholders with specific reference to the community members for the preparation of HFAPoA. With an objective to develop a detailed understanding of the provisions and procedures of PMAY as stipulated by Ministry of Housing and Urban Poverty Alleviation (MoHUPA), Gol a number of workshops and capacity building programmes were organised by the SUDA, GoWB both at the state level as well as ULB level. Details of the workshop and capacity building programmes organised by ULB (refer Annexure A-1 for photographs taken during workshop):

HFAPoA and Pradhan Mantri Awas Yojana (Housing for All)

To give pucca house for every family is currently on the global agenda. One of the Millennium Development Goals (MDGs) is to 'achieve significant improvement in the lives of slum dwellers, by 2022'. Similar goals are set forth by Pradhan Mantri Awas Yojana within year 2022, to create pucca house for every family.

ULB undertake a demand survey through suitable means for assessing the actual demand of housing. While validating demand survey, Cities consider possible temporary migration from rural areas to the city just to take advantage of housing scheme and exclude such migrants from list of beneficiaries. On the basis of demand survey and other available data, cities prepare Housing for All Plan of Action (HFAPoA). HFAPoA contain the demand of housing by eligible beneficiaries in the city along with the interventions selected out of four verticals. The information regarding beneficiaries is collected by ULB in suitable. While preparing HFAPoA, ULB and Implementing Agencies also consider the affordable housing stock already available in the city as Census data suggests that large number of houses are vacant.

Bank account number and Aadhaar number/Voter ID card/any other unique identification details of intended beneficiaries or a certificate of house ownership from Revenue Authority of beneficiary's native district integrate in the data base of HFAPoA for avoiding duplication of benefit to one individual family. Beneficiaries is validated by ULBs thereby ensuring their eligibility at the time of preparation of the projects and approval of projects.

On the basis of HFAPoA, States/Cities subsequently prepare the Annual Implementation Plans (AIPs) dividing the task upto 2022 in view of the availability of resources and priority. For larger cities, HFAPoA and AIPs is prepared at sub-city (ward/zone etc.) level with the approval of concerned State/UT Government. The result of demand survey, draft HFAPoA and draft AIP is discussed with the local representatives including MLAs and MPs of that area so that their views are adequately factored in while finalising the plans and beneficiary list.

Cities which have already prepared Slum Free City Plan of Action (SFCPoA) or any other housing plan with data on housing, utilise the existing plan and data for preparing "Housing for All Plan of Action" (HFAPoA). Houses constructed under various schemes should be accounted for while preparing HFAPoA

The preparation of HFAPoA broadly involve Slum Development/Rehabilitation Plans based on

- a. Survey of all slums – notified and non-notified;
- b. Mapping of slums using the state-of-art technology;
- c. Integration of geo-spatial and socio-economic data; and
- d. Identification of development model proposed for each slum.

1. Base maps to an appropriate scale would be a pre-requisite for the preparation of Slum Development Plan/Slum-free City Plan. States/UTs may need to proceed in the following steps for the preparation of Slum-free City Plans.
2. Securing CARTOSAT II/latest satellite images from NRSC/ISRO and preparation of base maps for the whole city and its fringes using the images;
3. Identification and inventory of all slum clusters of all descriptions in the urban agglomeration with the help of satellite image and other available data;
4. Inventory of all possible vacant lands in each zone of the urban agglomeration that could be
used for slum development/ rehabilitation development purposes;
5. Development of Slum Map of every slum within the city and its fringes using GIS with CARTOSAT II images, ground level spatial data collected through total station survey, collating spatial information with respect to plot boundaries, network of basic infrastructure like roads, sewerage, storm drainage and water lines, etc and superimposing this on the satellite image and importing them into GIS platform as the first step towards the preparation of Slum Development Plans and Slum Free City Plan.
6. This may be undertaken with the help of technical partners of NRSC/ ISRO/other technical institutions.
7. Identification and engagement of Lead NGO/CBO to guide and anchor community mobilization for the purpose of slum survey, (May be more than one NGO/CBO in different slum zones) of the city. These Lead NGOs/CBOs should also be associated in slum survey operations and dialogues for preparation of slum level development plans;
8. Conduct of Slum Survey based on the detailed formats (with or without changes)

prepared by the Ministry of Housing & Urban Poverty Alleviation with the help of National Buildings Organization (NBO) - after due training of trainers, training of survey personnel /canvassers and canvassing. It would be helpful for community mobilization to pick as many canvassers from the sourced slum or nearby slum pockets;

9. Collection of bio-metric identification data of slum dwellers based on the above survey (subject to guidelines issued by Unique Identity Authority of India (UIDAI));

10. Entry of data from Slum Surveys in the web-enabled MIS application (to be provided by Ministry of HUPA), compilation and collation of data, preparation of Slum-wise, City and State Slum Survey Database and Baseline Reports. The MIS will assist in developing a robust Slum and Slum Households Information System. (Guidelines and software for development of the MIS will be issued by the Ministry of HUPA);

11. Integration of Slum MIS with GIS Maps to enable the preparation of GIS-enabled

Slum Information System that is to be used for the preparation of meaningful Slum Development Plans and Slum-free City Plan using a city-wide/zone-based approach. (Guidelines and software for development of GIS platform and its integration with the MIS will be issued by the Ministry of HUPA);

Introduction to Pradhan Mantri Awas Yojana (PMAY)

Pradhan Mantri Awas Yojana (PMAY), a path breaking scheme for the slum dwellers and urban poor envisages a 'Pucca house to every family' through encouraging States to tackle the problem of slums in a holistic manner. It calls for a multi-pronged approach focusing on:

- ☐ Bringing existing slums within the formal system and enabling them to avail of the same level of basic amenities as the rest of the town.
- ☐ Redressing the failures of the formal system that lie behind the creation of slums.
- ☐ Tackling the shortages of urban land and housing that keep shelter out of reach of the urban poor and force them to resort to extra-legal solutions in a bid to retain their sources of livelihood and employment.
- ☐ Enactment of a set of reforms at the state and city level related to inclusive planning, regulation and financing, which would ensure that

adequate fresh housing stock and services get created on an ongoing basis to address both current and future needs of cities.

- An integrated approach covering shelter, services and livelihoods for poor slum communities.

The duration of Pradhan Mantri Awas Yojana [PMAY] 2015 TO 2022

Eligible Components of the PMAY:

Allotment of Houses

Allotment of dwelling units will be in the name of the female member of the . Alternatively, it can be allotted in the name of husband and wife jointly. Ownership of land required for every Beneficiary.

A EWS beneficiary family will comprise husband, wife and unmarried children.

The beneficiary family should not own a pucca house (an all weather dwelling unit) either in his/her name or in the name of any member of his/her family in any part of India to be eligible to receive central assistance under the mission.

EWS households are defined as households having an annual income up to Rs.3,00,000 (Rupees Three Lakhs). States/UTs shall have the flexibility to redefine the annual income criteria as per local conditions in consultation with the Centre.

Following infrastructure will be considered for support under PMAY:

1. Water connection
2. Toilet facilities
3. 24 x 7 Electric facilities
4. Roads

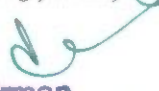

Need for Projects

This development project models will give benefits in the city . One of the key objectives of developing the Projects is to incentivize innovation and encourage new approaches and solutions that can demonstrably improve the quality and quantity of shelter and services for the poor.

Definition of Slum for Housing

Different definitions of a slum exist in different statutes and in urban poverty literature. For the purpose of HOUSING SCHEME, it is proposed to adopt the definition given in the 2001 Census, which is as follows:

- a. All areas notified as 'Slum' by State/Local Government and UT Administration under any Act;
- b. All areas recognized as 'Slum' by State/Local Government and UT Administration, which have not been formally notified as slum under any Act;

'Slum' or 'Slum Area'– is a compact settlement of at least 20 households (For NE & Special Category States it is 10-15 households) with a collection of poorly built tenements, mostly of temporary nature, crowded together usually with inadequate sanitary and drinking water facilities in unhygienic conditions.

Situation Appraisal

The people living in the slums mostly have kutcha (10) and semi-pucca (186) housing. In certain cases where pucca housing is available, they are usually in dilapidated condition. The kutcha houses are in very poor condition and require extensive repairs. Most of the houses have tiles on roof. While during the survey some of the houses have been noted to be in average condition, the quality of these houses is also speedily deteriorating.

Building Plan

The buildings are proposed to cover an area of approximate 32 Sq.mt along with provision of 2 rooms, kitchen and sanitation facility. The layout, size and type design of housing dwelling units depends on the local conditions and the preferences of the beneficiary. The houses, has been designed in accordance with the desire of the beneficiaries, keeping in view the climatic conditions and the need to provide ample space, kitchen, ventilation, sanitary facilities, etc. and the community perceptions, preferences and cultural attitudes.

In line with the scheme, carpet area of the house will be not less than 25 sq. mts and preferably two room accommodation plus kitchen and toilet should be constructed.
