A. BACKGROUND

Kaliyaganj though is not a big town in size; but it is one of the oldest town of undivided Bengal under erstwhile Dinajpur District. It was used as corridor in between Bihar and Dacca (now Bangladesh) through Railway connecting Coochbehar (Gitaldah) and Kolkata (Sealdah) and maintaining the balance of trade of Bihar, Uttar Pradesh, Assam including East Bengal now Bangladesh. It is said that Kaliyaganj is the immediate next to Kanpur (U.P.) as business centre of Rice, Mustard oil, Jute and Wheat & Maize. After the partition of Bengal in 1947, the Dinajpur District was divided into two parts out of which one part was known as West Dinajpur and the another part was emerged with East Bengal now known as Bangladesh. Again on 1st April 1994 the West Dinajpur has been sub divided into two parts – one is known as Dakshin Dinajpur and another is known as Uttar Dinajpur under which Kaliyaganj exists. Despite so may partitions and sub-partitions, Kaliyaganj did not loose its importance and Business activities as was in long ago. Kaliyaganj is the only place in the Uttar Dinajpur District where we get the touch of ancient business culture and exchange of views on socio-economic condition, human culture and tradition.

After recognition of Uttar Dinajpur District on 1st April 1994 Kaliyaganj is known as the second big town of the district just after the district town located at Raiganj. It is an important business centre in the north eastern region. It is great pleasure that after converting the old meter gauge rail-line into a broad-gauge one the trade and commerce

of Kaliyaganj has remarkably been improved. It is hoped that after opening of Roadways with Bangladesh through Dinajpur Border (adjacent to Kaliyaganj P.S.) the trade and commerce of Kaliyaganj will play a vital role in northern India which is going to be opening shortly. The "TULAI-PANJI" rice of Uttar Dinajpur is well-known to all the Bengalees for which the major portion of cultivable land for production of this paddy is situated at Kaliyaganj. There are so many small scale Industries for processing of Mustard Oil at Kaliyaganj from where the Mustard oil is exported through out India specially in northern part of India.

BASIC OF THE TOWN

i) LOCATION :

Kaliyaganj is situated on the west side of the Bank of the river Srimati which was used as shipping route from Dacca (Now Bangladesh) to Kolkata under the British rule for trade and commerce. It played a vital role for transportation of goods under trade and commerce by which Kaliyaganj established itself as an important Business centre and hinterland. It was also well connected with northern part of India, Dacca and Kolkata with Railway. Bangladesh is only 9 km away from Kaliyaganj. Besides, Kaliyaganj is also well connected with other important places and towns by roadways.

ii) AREA :

The total area of the town is about 11.67 sq.km. The rapid growth of population is expending the town day after day overlapping the Panchayat areas which will require to be notified as Municipal area in future by the Govt.

iii) POPULATION :

According to census report of 2011, the population of existing 17 wards was 47,639.

iv) CLIMATIC CONDITION & RAINFALL :

The climate condition of Kaliyaganj is of tropical nature. Mainly three types of seasons are visible here. These are Summer, rainy and Winter. The summer season persistently lasts for seven months from 15th of march to 15th of October. Under the supremacy of summer, the Rainy season starts from 15th of June and continues upto 15th of October which lasts upto four months. These two brothers, Summer and Rainy season jointly use to take the major period of the climatic

cycle. The rest five months from 15th of October to 15th of March remain for winter. During summer the day temperature raises maximum of 40⁰ C and minimum 28⁰ C. The rainfall is considerably satisfactory. Total yearly rainfall remains between 450 mm to 550 mm. During winter the minimum temperature at night stands at about 7⁰ C.

v) URBAN CLIMATE :

The rapid growth and the increasing needs of population of urban areas are making the vacant lands filled up, deforestation and filling up of ponds and tanks by multistoried buildings and Industries to live in resulting pollution in every day life in every step. To control this pollution modern technology is required to be adopted for which fund is essential.

vi) SOIL :

Usually the land of Kaliyaganj Municipality is alluvial in nature and suitable for agriculture. Mainly the plains and water land are seen here.

vii) ADMINISTRATIVE SETUP :

Kaliyaganj Municipality is the neighboring town of the District town Raiganj of Uttar Dinajpur District which is only 15 KM away. The town achieved its Municipal status in the year 1987 and is running with its Board of Councillors with Chairman, Vice-Chairman and Leader of Opposition since 1994.

Depending upon the socio-economic condition of the people small scale industries and cottage industries have been established by the unemployed youth to fight with unemployment. Most of these Industries are Mustard Oil Mills, Mini Rice Mills, Flour Mills and Processing Units etc. The progress in the field of Industries is lacking behind due to non-cooperation of financial Institutions. No large Industries either by joint venture or by private sector has yet been established here though the location and other infrastructures are quite favorable. About 19,724 of the total population is still identified as slum population who find their livelihood by pulling Rickshaws, Driving trucks and Private Buses, cow-carts and daily labours. The female populations find their livelihood in making cow dung cakes, processing rice and puffed rice and by working as maid servants. Attempts are being taken for poverty alleviation by formation of more and more SHG's. Some of the people are engaged in Govt. services, commercial and other services activities.

There is a state Highway from Raiganj (Uttar Dinajpur) to Balurghat (Dakshin Dinajpur) which has been gone through the heart of Kaliyaganj town and the Kaliyaganj town is only 25 km away on the North east side of Raiganj. As the N.H. 34 crossed over the State Highway 10A at District town Raiganj from South to North direction, Kaliyaganj town is well connected with northern part of the India like, Siliguri, Jalpaiguri, Coochbehar, Assam and other north eastern states. HFAPoA and Pradhan Mantri Awas Yojana (Housing for All)

To give pucca house for every family is currently on the global agenda. One of the Millennium Development Goals (MDGs) is to 'achieve significant improvement in the lives of slum dwellers, by 2022'. Similar goals are set forth by Pradhan Mantri Awas Yojana within year 2022, to create pucca house for every family.

ULB undertake a demand survey through suitable means for assessing the actual demand of housing. While validating demand survey, Cities consider possible temporary migration from rural areas to the city just to take advantage of housing scheme and exclude such migrants from list of beneficiaries. On the basis of demand survey and other available data, cities prepare Housing for All Plan of Action (HFAPoA). HFAPoA contain the demand of housing by eligible beneficiaries in the city along with the interventions selected out of four verticals. The information regarding beneficiaries is collected by ULB in suitable. While preparing HFAPoA, ULB and Implementing Agencies also consider the affordable housing stock already available in the city as Census data suggests that large number of houses are vacant.

Bank account number and Aadhaar number/Voter ID card/any other unique identification details of intended beneficiaries or a certificate of house ownership from Revenue Authority of beneficiary's native district integrate in the data base of HFAPoA for avoiding duplication of benefit to one individual family. Beneficiaries is validated by ULBs thereby ensuring their eligibility at the time of preparation of the projects and approval of projects.

On the basis of HFAPoA, States/Cities subsequently prepare the Annual Implementation Plans (AIPs) dividing the task upto 2022 in view of the availability of resources and priority. For larger cities, HFAPoA and AIPs is prepared at sub-city (ward/zone etc.) level with the approval of concerned State/UT Government. The result of demand survey, draft HFAPoA and draft AIP is discussed with the local representatives including MLAs and MPs of that area so that their views are adequately factored in while finalising the plans and beneficiary list.

Cities which have already prepared Slum Free City Plan of Action (SFCPoA) or any other housing plan with data on housing, utilise the existing plan and data for preparing "Housing for All Plan of Action" (HFAPoA). Houses constructed under various schemes should be accounted for while preparing HFAPoA

Urban Population Living in Slums and the Indian Scenario (source: UN-HABITAT)

The preparation of HFAPoA broadly involve Slum Development/Rehabilitation Plans based on

- a. Survey of all slums – notified and non-notified;
 - b. Mapping of slums using the state-of-art technology;
 - c. Integration of geo-spatial and socio-economic data; and
 - d. Identification of development model proposed for each slum.
-
1. Base maps to an appropriate scale would be a pre-requisite for the preparation of Slum Development Plan/Slum-free City Plan. States/UTs may need to proceed in the following steps for the preparation of Slum-free City Plans.
 2. Securing CARTOSAT II/latest satellite images from NRSC/ISRO and preparation of base maps for the whole city and its fringes using the images;
 3. Identification and inventory of all slum clusters of all descriptions in the urban agglomeration with the help of satellite image and other available data;
 4. Inventory of all possible vacant lands in each zone of the urban agglomeration that could be
used for slum development/ rehabilitation development purposes;
 5. Development of Slum Map of every slum within the city and its fringes using GIS with CARTOSAT II images, ground level spatial data collected through total station survey, collating spatial information with respect to plot boundaries, network of basic infrastructure like roads, sewerage, storm drainage and water lines, etc and superimposing this on the satellite image and importing them into GIS platform as the first step towards the preparation of Slum Development Plans and Slum Free City Plan.
 6. This may be undertaken with the help of technical partners of NRSC/ ISRO/other technical institutions.
 7. Identification and engagement of Lead NGO/CBO to guide and anchor community mobilization for the purpose of slum survey, (May be more than one NGO/CBO in different slum zones) of the city. These Lead NGOs/CBOs should also be associated in slum survey operations and dialogues for preparation of slum level development plans;
 8. Conduct of Slum Survey based on the detailed formats (with or without changes)

prepared by the Ministry of Housing & Urban Poverty Alleviation with the help of National Buildings Organization (NBO) - after due training of trainers, training of survey personnel /canvassers and canvassing. It would be helpful for community mobilization to pick as many canvassers from the sourced slum or nearby slum pockets;

9. Collection of bio-metric identification data of slum dwellers based on the above survey (subject to guidelines issued by Unique Identity Authority of India (UIDAI));

10. Entry of data from Slum Surveys in the web-enabled MIS application (to be provided by Ministry of HUPA), compilation and collation of data, preparation of Slum-wise, City and State Slum Survey Database and Baseline Reports. The MIS will assist in developing a robust Slum and Slum Households Information System. (Guidelines and software for development of the MIS will be issued by the Ministry of HUPA);

11. Integration of Slum MIS with GIS Maps to enable the preparation of GIS-enabled

Slum Information System that is to be used for the preparation of meaningful Slum Development Plans and Slum-free City Plan using a city-wide/zone-based approach.(Guidelines and software for development of GIS platform and its integration with the MIS will be issued by the Ministry of HUPA);

Definition of Slum for Housing

Different definitions of a slum exist in different statutes and in urban poverty literature. For the purpose of HOUSING SCHEME, it is proposed to adopt the definition given in the 2001 Census, which is as follows:

- a. All areas notified as 'Slum' by State/Local Government and UT Administration under any Act;
- b. All areas recognized as 'Slum' by State/Local Government and UT Administration, which have not been formally notified as slum under any Act;

'Slum' or 'Slum Area'– is a compact settlement of at least 20 households (For NE & Special Category States it is 10-15 households) with a collection of poorly built tenements, mostly of temporary nature, crowded together usually with inadequate sanitary and drinking water facilities in unhygienic conditions.

Situation Appraisal

The people living in the slums mostly have kutcha (10) and semi-pucca (186) housing. In certain cases where pucca housing is available, they are usually in dilapidated condition. The kutcha houses are in very poor condition and require extensive repairs. Most of the houses have tiles on roof. While during the survey some of the houses have been noted to be in average condition, the quality of these houses is also speedily deteriorating.

Proposed Intervention

In line with the vision to '**housing for all**', an integrated housing programme is proposed to be implemented. The target will be all the slum /Non Slum dwellers in the pocket.

Building Plan

The buildings are proposed to cover an area of approximate 32 Sq.mt along with provision of 2 rooms, kitchen and sanitation facility. The layout, size and type design of housing dwelling units depends on the local conditions and the preferences of the beneficiary. The houses, has been designed in accordance with the desire of the beneficiaries, keeping in view the climatic conditions and the need to provide ample space, kitchen, ventilation, sanitary facilities, etc. and the community perceptions, preferences and cultural attitudes.

In line with the scheme, carpet area of the house will be not less than 25 sq. mts and preferably two room accommodation plus kitchen and toilet should be constructed.

Compliance with Municipal Bye laws

All designs & drawings are created keeping in line with the municipal bye laws.

Building material

- ☐ PCC (1:3:6) for foundation
- ☐ RCC M-20 for substructure & superstructure (Column, Beam, Slab)
- ☐ HYSD Steel
- ☐ 1st class Brick Masonry
- ☐ 1:6 (Cement: Sand) plaster – 10 mm on soffit of beam & slab, 15 mm on internal walls & 20 mm on external walls

Structural Design

- ☐ Following are the general considerations in the analysis/design.
- ☐ For all structural elements, M20 grade concrete and Fe 415 grade of steel is used.
- ☐ Plinth beams passing through columns are provided as tie beams.
- ☐ Pedestals are proposed up to ground level.
- ☐ Beam Centre-line dimensions are followed for analysis and design.
- ☐ For all the building, walls of 250 mm and 125mm thick with 20 mm External plaster and 12 mm thick internal plaster are considered.

- Seismic loads are considered acting in the horizontal direction along either of the two principal directions.
