1. Situation assessment for HFAPoA

1.1 Background

At Country level slum decadal growth rate is 34%, the slum households are projected to go upto 18 million. 2 million non-slum urban poor households are proposed to be covered under the Mission. Hence, total housing shortage envisaged to be addressed through the new mission is 20 million.

The Mission will be implemented during 2015-2022 and will provide central assistance to Urban Local Bodies (ULBs) and other implementing agencies through States/UTs for:

1. In-situ Rehabilitation of existing slum dwellers using land as a resource through private participation
2. Credit Linked Subsidy
3. Affordable Housing in Partnership
4. Subsidy for beneficiary-led individual house construction/enhancement.

Credit linked subsidy component will be implemented as a Central Sector Scheme while other three components will be implemented as Centrally Sponsored Scheme (CSS).

The scheme will cover entire urban area consisting of 4041 statutory towns with initial focus on 500 Class I cities in three phases. Credit linked subsidy component of the scheme would be implemented across the country in all statutory towns right from the beginning.

In the spirit of cooperative federalism, mission will provide flexibility to the States for choosing the best options amongst four verticals of mission to meet the demand of housing in their states. Process of project formulation and approval in accordance with the mission Guidelines would be left to the States so that projects can be formulated, approved and implemented faster.

A Technology Sub-Mission under the Mission would be set up to facilitate adoption of modern, innovative and green technologies and building material for faster and quality construction of houses. Technology Sub-Mission will also facilitate preparation and adoption of layout designs

and building plans suitable for various geo-climatic zones. It will also assist States/Cities in deploying disaster resistant and environment friendly technologies.

1.3. City Profile and Overview

(Write in very brief about History, Year of Establishment of Municipality/Municipal Corporation, Administrative Boundaries, Demographic profile in brief, Linkages of Rail/Road/Port/ Air, Places of Interest etc.)

The settlement in the beginning was concentrated at Ganga Nagar & Chandigarh around Madhyamgram Railway Station. The land was covered by agricultural uses, mostly paddy fields. After independence huge influx of refugee settled around Udairajpur, Bankim Pally, etc. In the early 70's Basunagar area was developed as a plotted residential area with the help of a local promoter. Thereafter LIC Township and Bijohnagar came up as plotted townships.

Starting with barely 40,000 to 50,000 population, served by mass transit system, namely railway, job opportunities in the neighbouring metropolitan city, growing industries, proximity to a busy

air-port and environmentally pleasing locality, more and more urban people got attracted and started settling here.

The Madhyamgram Municipality was founded on 7th September, 1993 with Shri Saral Sen as nominated Chairman. Finally on 27th May 1994 the present Madhyamgram Municipality was formed through general election of Councillors, comprising 23 nos. of wards as per gazette notification and subsequently to 28 numbers.

The Madhaymgram Municipality is located within Kolkata Metropolitan Area. Madhyamgram Municipality is 25 Kilometer away from Kolkata in north of Kolkata Metropolitan Area. It forms the Northern boundary with Barasat Municipality, southern part with North Dum Dum and Rajarhat Gopalpur Municipality, eastern part is bounded by New Barackpor Municipality and western part is bounded by Rohanda and Chandigarh Gram Panchayats.

It is situated 25Km to the north-east of Kolkata Municipal Corporation on the east bank of the Hooghly. It is served by the south-eastern railway with stations at Madhayamgram, Sodepur road and Jessor road (NH-35), Badu road. Soon it will be served by North-South Metro from Joka to Barasat and beyond and will be linked to east-west Metro towards Howrah station.

It is divided into 28 wards, with area 21.56 Sq. Km and total population 1.96 lakh, Census,2011.

Its population as per Census,2011 is 1.96 lakh and has increased from 1.07 lacs Census,1991 to 1.56 lacs in 2001 and further to 1.96 lacs in 2011. Projected population of the Municipality is around 2.40 lac by 2021.

Gross population (Census) density is nearly 9090 pp sq km in 2011 higher than metro city standard (UDPFI). Projected population may be more with improvements in infrastructure pattern namely rapid transit systems, water, drainage and power supply, socio-economic facilities, employment opportunities etc. etc. .

Its main drainage channels are Noaikhal and Banikantha (Chatka) Khal.

The decadal growth rate (2001-2011) of Madhayamgram Municipality is 26.45%, at this trend projected population by the year 2031 will be around 2.80 lakh, hence population density will be 12987 persons per Sq. Km while at present is around 9090 persons per Sq Km.

Gross Population Density

Gross population density showing the land-man ratio in a given area at a given time has a great significance for the point of view of planning. The environmental problem are generally very much aggravated in the area of high density but some what simpler in the area of low density. Accusation of land is much more difficult and relocation of population presence many more intricacies in high density areas than in low density area. It is also in this context of economic and social planning per capita cost of providing some kind of urban amenities is relatively lower in high densities areas there being how ever always a break even point with respect to growth. Low per capita cost maybe and is often associated with high per unit area cost and vice-versa. Madhyamgram Municipality becoming more and more crowded as is reflected in its density continuously rising from 6163 persons per sq. km. in 1991 to 7230 persons per sq. km. in 2001 and further to 9061 in 2011. While this over Kolkata Metropolitan Area (in 1991 Kolkata Metropolitan Area has 7012 persons per sq. km. and 8380 persons per sq. km. in 2001). The ward wise gross population densities of Madhyamgram Municipality have been listed below and graphically represented Municipal map which have been attached.

Table 1.3.2: Gross population density across the ward Madhyamgram Municipality

Density is highest at W16 (39326 persons/Sq Km) followed by W22 (18819), W20 (18190) and it is lowest at W2(2496). Density is highest along Jessor Road and lowest furthest from it.

((Existing Housing stock, land availability, land use, construction cost, Housing typologies, information on current city housing projects etc

Spatial coverage and adequacy of Water supply, solid waste management, Sewerage, storm water drainage etc.,)

Most of the slum is in low & waterlogged area, some are on unauthorized land along the railway track, khal par, road side, vacant factory land etc. Condition of drain in such area is poor and is encroached, some where slum dwellers built their house on the drain, slum dwellers use drain as a garbage disposal ground and hence choked the drainage system. Water supply is not adequate, sanitary condition poor, areas are fire hazardous, dropout rate among students from slum area is high.

Dwelling unit structure

Most of the dwelling units are semi pucca 6480 numbers (54% of the total surveyed households), followed by Pucca 3600 numbers (30%) and kutcha 1920 numbers (16%). Situation depicted in figure below

Source:USHA survey information,2012

Land Tenure status

On rent 1680(20% of total), followed by possession certificate 6120 (51%) households, encroached Private land 720 (7%), Patta holder 960 (9%), Encroached public land 1440 (12%) and other type 1080 (9%).

1.5.1. Slum Profile and its Location

(Including slum dwelling unit density, land values, land ownership and tenure status of the slums)

Most of the slum are located in Fringe Area. So far ownership is concerned maximum slums are privately owned (110) only 7 slums are located on encroached land that may be legalised by the West Bengal State Government very soon. Density in slum area is around 7540 persons / Sq Km. For information Refer Table:1.5.1.1 below.

1.5.2. Summary of Findings of Demand Survey

Demand survey has been conduct both in slum and non-slum area. Of the total household survey of 7896 numbers 7349 is within slum area and remaining 517 numbers in non-slum area. Majority of the surveyed households are semi-pucca (81% of the total, rest 1500 or 19% are kutchra), beneficiaries opted for self construction option. Most of them have land and structure and very few are presently rent holder with vacant land within the municipality.

1.5.3. Broad infrastructure status in slum areas

(It shall describe broad slum infrastructure status and future program related to infrastructure development where slum will be benefited)

Most of the slum are accessible by all weather road, but entire part of the slum are not equally accessible.

Drainage system is moderate, some of the slum is suffered from water logging (15 to 30 days). Some of the slum are not connected by storm water drainage system.

All are covered by piped water but all slum households are not connected

Most of the slums are connected by street light.

Entertainment facility within the slum area is not available.

1.6. Tenability Analysis

(Categorising all slums in the ULB as Tenable and untenable slums)

- Tenable slums

(Analysis of all tenable slums against criteria such as land values, land ownership, tenure status and dwelling unit density- briefly state the findings)

Of the total 118 slums spreaded over 28 wards only 1, namely Mohuri bustee is Tenable and that has been excluded in the preparation of HFAPoA.

- Untenable Slums and Strategy for slum resettlement if any

(Analysis of reason of becoming untenable slums, total no. of household affected etc.)

Of the total 118 slums, 117 are untenable, mostly are on private land (110 numbers) only 7 numbers are on land of irrigation department. The State-ULB has considered such special case and has taken into consideration in the preparation process of the HFAPoA.

2. Assessment of Existing and likely Future Housing Shortage

2.1. Existing Housing Shortage (Non Slums)

(Estimation of the existing housing shortage for urban poor by comparing the existing housing requirement with the existing housing stock data for the urban poor).

As per Urban poor data total urban poor is 9091 numbers of which 1091 are in non slum area. Existing housing requirement in non-slum area is around 1091 numbers.

2.2. Likely future Housing Shortage

(The population of EWS/LIG and household sizes obtained from Census/ SECC/ the socio economic surveys / National Sample Surveys projected for the next 10-15 years would give the housing requirement for the next 10-15 years.

5. Institutional Arrangements for Implementation of Development Options

(Proposed Institutional framework at State and ULB level and Their Roles and Responsibilities)

Project will be implemented jointly by the State and ULB.

ULB will be prepared Detail Project Report as per MHUPA guidelines under supervision of State level agency

State agency will monitor phase wise different activities of the ULB

ULB will take necessary approval from its Board of Councilors

Phase wise ward wise beneficiary will be selected by the ULB in consultation with Councilors and ward committee members.

6. Project Monitoring and Social audit

(Broad description of the Project monitoring and Social audit in line with guidelines)

A social audit is a process by which the people, the final beneficiaries of any scheme, programme, policy or law, are empowered to audit such schemes, programmes, policies and laws. A social audit is an ongoing process by which the potential beneficiaries and other stakeholders of an activity or project are involved from the planning to the monitoring and evaluation of that activity or project. It thereby tries to ensure that the activity or project is designed and implemented in a manner that is most suited for the prevailing (local) conditions, appropriately reflects the priorities and preferences of those affected by it, and most effectively serves public interest.

Social audits are those that are conducted jointly by the government and the people, especially by those people who are affected by, or are the intended beneficiaries of the activity being audited.

Principal:

Transparency : Complete transparency in the process of administration and decision-making, with an obligation on the government to suo moto (voluntary disclosure of information) give the people full access to all relevant information.

Participation: A right based entitlement for all the affected persons (and not just their representatives) to participate in the process of decision making and validation;

Representative participation : In those rare cases where options are predetermined out of necessity, the right of the affected persons to give informed consent, as a group or as individuals, as appropriate.

Accountability: Immediate and public answerability of elected representatives and government functionaries, to all the concerned and affected people, on relevant actions or inactions.

Social audit will be done at any point of time during the planning and implementation of a scheme/ programme.

Planning stage: to ensure that the ULB Plan is need-based covering productive/ investments and drawn up in consultation with community serving the poor and the disadvantaged.

Preparation stage: to ensure that estimates are proper and are in tune with the approved quantum of work

Implementation stage: to ensure that dwelling units are constructed rightly, given to proper and to right people

After the completion of work: to ensure that quality of work is in tune with quantity and estimated cost.

Social Audit will be carried out by different stakeholders namely the State, ULB, Ward Committee, Beneficiary, implementing agency etc. The entire ULB is expected to participate in Social Audit. Since this may not be always possible, a group can be formed voluntarily (with encouragement by ULB and officials) with representatives from beneficiaries, SHGs, community leaders, youth clubs, marginalised sections (SC/ST/Women) etc.
