IMPLEMENTATION SCHEDULE

A Monitoring & Evaluation team has to be formed to know the post project impact on the slums and to document the best practices

Health

Slum population as percentage of total urban population is roughly 34%. As mentioned somewhere in the report that IHSDP programme is being implemented in 54 slums. There are altogether 10 primary schools located in slums. The location and distance of nearest primary schools lies between 500 m to 1000 m approximately. Similarly, the location and distance of nearest primary Health Centre / UHP / UFWC lies between 1000 m to 3000 m approximately

Housing Infrastructure

The individual houses in the slum pockets are in general temporary in nature, without having a permanent roof structure. Proper sanitary facilities are absent which not only endangers the individual health, but also the environmental conditions of the slum and consequently the town is general

Water Supply

The existing water supply facilities in the slum pocket is inadequate. Although the slums have sufficient source of water in the form of either tube wells or existing municipal water sources, they lack a proper distribution system for efficient use of the water. In order to solve this problem, a network of distribution lines in slum pockets have been proposed. This will reduce their inconvenience for procurement of water from a distant place as well as improve their personal health and hygiene

Drainage

Haphazard growth and settlement in the slum area has blocked the natural drainage courses, which in turn causes water logging and stagnation in different parts of the slum. This accumulated water causes to generate public health problems. The proposed drainage system by means of construction of new drains will help to provide relief to the slum dwellers by means of efficient and effective disposal of storm water through the outfall channels. This drain will carry both sewerage and storm water. The outcome of this scheme will by and large enhance the quality of civic life by way of promotion and safeguarding the public health and environmental pollution.

Roads

The existing road network system of the slum has become inadequate to cope up with the present and ever increasing needs. In order to bear the additional load due to enhanced civic, economic and commercial

activities of the slum,existing road network system in several places are required either to be upgraded or widened and new roads are also be constructed in a number of places where the network is inadequate. The project is intended to ease at the movement of slum dwellers and smooth flow of pedestrian and light vehicle,which will enhance the quality of civic amenities in the slum. As a result,the quality of life in the slum will also improve substantially.

Street Light

After successful implementation of the scheme will remove prevailing darkness in slum area after sunset. This will ultimately alleviate inconvenience faced by slum dwellers during night.

Primary Education :

Existing facilities for pre school education,non formal education,adult education are not suite adequate but there are a few number of primary education centres in the slum area,with admission rates not suite satisfactory. Moreover every year the drop out rates of student from such primary education is quite significant.

Sishu Siksha Kendra,Mid-day Meal Programme will reduce the dropouts from the school and increase number of school goes at primary level.

Formulation and implementation of O & M Plan

The assets created in project are required to be properly used and maintain The following steps will be taken of the' Operation and Maintenance of plan for slum and non slum:

- i. The ULB along with the CDS working in the Slum where infrastructure works were performed will arrange a meeting(1st)with all slum dwellers of that particular slum.
- ii. At this meeting the Local Councillor ,Chairman-in-Councilor Chairman-in-Council of slum development work, Municipal Engineers,Town Project Officer,Community Organiser, CDS members and RCV that particular slum will be present. Other members/ officials as also be present.
- iii. At this meeting the need for formation of Bustee Works Management Committee (BWMC)for looking after,Operation and Maintenance Plan for Slum Level Infrastructure work' will be explained to the slum dwellers.
- iv. The stock of work done and assets created under slum level infrastructure works of that particular slum will be listed at this meeting.
- v. At this meeting the ULB will brief the slum dwellers about the constitution ,role and functions of the BWMC.
- vi. A similar next meeting(2nd) will be held at which the BWMC will be elected as per constitution through informal election. If one meeting is not sufficient more such meetings may be arranged.Minute of each meeting with signature of the participants should be maintained.
